Version 0.2

Document Revision History

Version	Status	Date	Author	Reviewed by	Description of change
0.1	Draft	14.2.23	Bindu		<p>Added APIs in User Management section, Account Management section and Subscription section. Added new sections WDH Sim Order APIs, Notification Service, Probe Handler, API GW/NGINX, Invoice Data, Rating Service and Change Static IP</p> <p>Updated "Document Overview"</p> <p>Added API Version as V1 in Update Billing State API</p>
0.1		06.03.23	Bindu		Updated CR18 APIs and SIM Order APIs with the new version received.
0.2	Updated	29.03.23	Bindu		Updated URL and Body text for Change Static IP API and removed excess body text for Get Rate Plan Details by Rate Plan ID API.
0.3	Updated	12.04.23	Bindu		Updated correct URL and fieldnames in Invoice Details.

Contents

1	Introduction.....	16
1.1	API Overview.....	16

4.11	Set Default Network Profile to Account.....	74
4.12	Read Network Profiles Assigned to Account.....	76
4.13	Assign Rate Plan to Account.....	77
4.14	Set Default Rate Plan to Account.....	78
4.15	Read Rate Plans Assigned to Account.....	79

4.16	Assign Roaming Profile to Account.....	81
4.17	Set Default Roaming Profile to Account.....	81
4.18	Read Roaming Profiles Assigned to Account.....	83
4.19	Assign APN Group to Account.....	84
4.20	Set Default APN Group to Account.....	85
4.21	Read APN Groups Assigned to Account.....	86
4.22	Fetch Account APN Group.....	87
4.23	Create APN Group.....	89
4.24	Update APN Group.....	90
4.25	Update APN Details for a Group.....	92
4.26	Fetch APN Resource ID.....	93
4.27	Account Resource Query API.....	94
4.28	Create Account Resource API.....	95
4.29	Update Account Resource API.....	97
4.30	Fetch Account Resource by ID.....	98
4.31	Delete Account Resource by ID.....	99
4.32	Add MSISDN Pool to Account.....	100
4.33	Create Group.....	101
4.34	Update Group.....	102
4.35	Delete Group.....	103
4.36	Get Group.....	103
5	Subscription API.....	106
5.1	Fetch SIM API.....	106
5.1.1	Fetch SIM by Batch.....	106
5.1.2	Fetch SIM by ID.....	111
5.1.3	Fetch SIM by IMSI.....	113

5.1.4	Fetch SIM by ICCID.....	116
5.1.5	Fetch SIM by MSISDN	118
5.2	Fetch SIM using Filter.....	121
5.2.1	Fetch SIM by Status.....	121
5.2.2	Fetch SIM by IMSI	124
5.2.3	Fetch SIM by ICCID.....	127
5.2.4	Fetch SIM by MSISDN	130
5.2.5	Fetch SIMs by Page	133
5.3	SIM Filters	137
5.3.1	Single API Filter	149
5.3.2	Multiple API Filters.....	151
5.4	Fetch SIM Usage	154
5.4.1	GraphQL for Data Usage.....	154
5.4.2	GraphQL for SMS and Voice.....	155
5.4.3	GraphQL for SIMs with Data Usage.....	157
5.5	Fetch Session Details.....	165
5.6	Allowed SIM State Transitions.....	169
5.7	Update Billing State API	174
5.8	BatchId Status API	175
5.9	Assign APN (APN Group) to SIM	177
5.10	Assign Service Profile (Network Profile) to SIM.....	179
5.11	Change Rate Plan.....	181
5.12	Assign Roaming Profile to SIM.....	183
5.13	Send SMS API.....	184
5.14	Move SIMs API.....	185

5.14.1	Move SIMs by ICCID Range	185
5.14.2	Move SIMs by IMSI Range.....	187
5.15	Tags API.....	188
5.15.1	Create Tag API.....	188
5.15.2	Update Tag API	189
5.15.3	Delete Tag API.....	190
5.15.4	Assign Tag API.....	190
5.15.5	Add Multiple Tags API.....	191
5.16	Custom Fields at SIM Level	193
5.16.1	Create Custom Fields at SIM Level.....	193
5.16.2	Edit Custom Fields at SIM Level	194
5.16.3	Delete Custom Fields at SIM Level.....	195
5.16.4	Update Custom Fields at SIM Level	195
5.17	Reading CDR for Data.....	196
5.18	Send Cancel Location of SIM	202
5.19	Status.....	202
5.20	Update Group	204
5.21	Get Subscriptions by ID/Includes	205
5.22	Bulk SIM Subscription Group Assign	207
5.23	Group Subscriptions Single SIM	208
5.24	Get Audit History - SIM Life Cycle.....	209
6	Automation Rules API	212
6.1	Automation Rules for Resource Type Accounts	212
6.1.1	Create Automation Rule for Accounts.....	212
6.1.2	Edit Automation Rule for Accounts	215
6.1.3	Delete Automation Rule for Accounts.....	217

6.2	Automation Rules for Resource Type Subscriptions (Event)	219
6.2.1	Create Automation Rule for Subscriptions - Event (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	219
6.2.2	Edit Automation Rule for Subscriptions - Event (All SIMs/ICCID/IMSI/Rate Plan/Tag)	222
6.2.3	Delete Automation Rule for Subscriptions - Event (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	226
6.3	Automation Rules for Resource Type Subscriptions (Analytics)	228
6.3.1	Create Automation Rule for Subscriptions - Analytics (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	228
6.3.2	Edit Automation Rule for Subscriptions - Analytics (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	231
6.3.3	Delete Automation Rule for Subscriptions - Analytics (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	234
6.4	Automation Rules for Resource Type Subscriptions (Counter)	236
6.4.1	Create Automation Rule for Subscriptions - Counter (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	236
6.4.2	Edit Automation Rule for Subscriptions - Counter (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	239
6.4.3	Delete Automation Rule for Subscriptions - Counter (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	243
6.5	Automation Rules for Resource Type Subscriptions (All Triggers)	246
6.5.1	Create Automation Rule for Subscriptions – All Triggers (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	246
6.5.2	Edit Automation Rule for Subscriptions – All Triggers (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	249
6.5.3	Delete Automation Rule for Subscriptions – All Triggers (All SIMs/ICCID/IMSI/Rate Plan/Tag).....	253
6.6	Automation Rules for Resource Type Rate Plan (Counters)	255
6.6.1	Create Automation Rule for Rate Plan - Counters.....	255
6.6.2	Edit Automation Rule for Rate Plan - Counters	259

6.6.3	Delete Automation Rule for Rate Plan - Counters.....	262
6.7	Automation Rules for Resource Type Rate Plan (All Triggers)	264
6.7.1	Create Automation Rule for Rate Plan – All Triggers.....	264
6.7.2	Edit Automation Rule for Rate Plan – All Triggers	267
6.7.3	Delete Automation Rule for Rate Plan – All Triggers.....	270
7	Reports API	274
7.1	Get All Reports.....	274
7.2	Enable Report by ID.....	274
7.3	Disable Report by ID	276
7.4	Download Report by ID.....	277
7.5	Trigger a Report On-Demand.....	278
8	SIM Order APIs	281
8.1	Order Details APIs.....	281
8.1.1	Create Order.....	281
8.1.2	Update Order.....	284
8.1.3	Update Order Tracking Details	287
8.1.4	Update Order Note Details	287
8.1.5	Upload Attachment	288
8.1.6	Download Attachment.....	289
8.1.7	Get Order Details.....	289
8.1.8	Delete Order Details.....	290
8.2	Account Default Resource.....	291
8.2.1	Create Account Default.....	291
8.2.2	Update Account Default.....	292
8.2.3	Get Account Default.....	294
8.3	Product Catalogue Resource.....	294

8.3.1	Update Product Catalogue.....	294
8.3.2	Create Product Catalogue	296
8.3.3	Get Product.....	297
8.3.4	Delete Product	298
8.4	User Group Resource	298
8.4.1	Add User Group.....	298
8.4.2	Update User Group	299
8.4.3	Get User Group	300
8.5	Product Account Assignment.....	301
8.5.1	Add Product Account Assignment.....	301
8.5.2	Update Product Account Assignment	302
8.5.3	Get Product Account Assignment	303
8.5.4	Delete Product Account Assignment	303
9	Notification Service	306
9.1	Search SMS.....	306
9.2	Get SMS Details	307
9.3	Send SMS.....	309
10	Probe Handler	311
10.1	Get Network Registration Details.....	311
11	Rest Gateway APIs	314
11.1	Get Device Usage.....	314
11.2	Get Device Usage by Zone.....	315
11.3	Get Session Details.....	318
11.4	Get Usage by Rate Plan.....	319
12	Channel Management	323
12.1	Send PoD	323

13	API Gateway/NGINX.....	325
13.1	Echo.....	325
14	Invoice Data.....	327
14.1	Get Invoice Details.....	327
15	Rating Service.....	330
15.1	Get Rate Plan Name and ID.....	330
15.2	Get Rate Plan Details by Rate Plan ID.....	331
16	Change Static IP	340

The Internet of Things (IoT) holds vast promise for enterprises. Not only is it one of the principal engines of the so-called fourth industrial revolution, or Industry 4.0, that will transform manufacturing, but the IoT will boost efficiency and productivity across all enterprise activities.

By connecting and then managing the cooperation between machines, sensors and other devices, IoT will power new monitoring, tracking, measuring and analysis technologies. These advances will depend fundamentally on the continuous and uninterrupted flow of data between enterprise assets and operations, no matter how widely dispersed they are.

It's a highly complex undertaking to achieve this connectivity and manage the data flows to and from numerous fixed and moving assets, across multiple radio technologies and between any location on land, air, and sea. The challenge facing enterprises, especially multinationals, is immense.

Now there's an answer with Nokia's Worldwide IoT Network Grid (WING) Digital Hub. This complete managed service has been created with communication service providers and enterprise customers in mind, to help them enter the world of IoT, or further grow their existing IoT offerings. WING Digital Hub manages the IoT connectivity and services needs of assets, such as connected cars or connected freight containers, as they move around the globe, reducing complexity for large enterprises which would otherwise be required to work with multiple mobile network and technology providers.

Nokia WING Digital Hub offers a unique, API driven, geographically distributed IoT core as a service, as well as a single unified IoT platform that has all the functionality for real-time management of IoT devices across the globe. This uniquely designed, multi domestic self-service portal offers the benefits of full automation and notification and gives access to unique views and dashboards.

Enterprises benefit from a truly global IoT connectivity grid with a fast and simple go-to-market route for their connected applications and total connectivity management including a dedicated SLA which fits their specific applications. They gain assured levels of performance, full expert support and additional capabilities such as analytics to provide deeper insight.

About WING Digital Hub

WING Digital Hub (Worldwide IoT Network Grid Hub) is a robust and highly scalable **IoT (Internet of Things)** application that helps organizations manage and monitor their SIM Cards and things to capture data at varied volumes and speeds. The **WING Digital Hub** comprises of numerous building blocks, such as:

- Resources

- Data usage
- Tariffs
- SIM lifecycle management
- Virtual pools
- Reports
- Diagnostics

This manual describes the API capabilities of WING Digital Hub and guides you through a detailed set of procedures to achieve specific outcomes.

Intended audience

This document is meant to function as a ready reference for the following audience:

- Software Product Developers
- System Administrators
- System Support Team

Conventions used

This manual uses the following typographical conventions:

Appearance	Description
<i>emphasis</i>	Text that is emphasized.
{variable}	A value or parameter that user provides.
<user input>	User input required.
[optional]	An optional variable.
{value 1 value 2}	A choice of values of variable from which one value or variable is used.

Resources

The following documentation resources may be of use when working with WING Digital Hub API:

Title	Description
REST API	https://en.wikipedia.org/wiki/Representational_state_transfer
OAuth2	https://oauth.net/2/

Title	Description
JWT	https://jwt.io/
OpenAPI	https://swagger.io/resources/open-api/
REST API	https://en.wikipedia.org/wiki/Representational_state_transfer

Glossary

Term/Acronym	Description
API	Application Programming Interface
CMP	Connectivity Management Platform
EndPoint	URL that is accessible that may give or take a request and provide a response in text/ binary format
JSON	JavaScript Object Notation
JWT	JSON Web Token
Oauth2	OAuth 2.0 is the industry-standard protocol for authorization
Realm	An authentication group name assigned to you during the signup of tenant
Tenant	A unique code assigned to you as WING Digital Hub user

Chapter 1

Introduction

NOKIA

The background of the slide is a vibrant blue. On the left side, there is a vertical dark blue bar. The bottom half of the slide is dominated by a series of flowing, overlapping white and light blue lines that create a sense of motion and depth, resembling a stylized wave or a digital signal. The text is centered in the upper half of the slide.

1 Introduction

This chapter provides an overview of the WING Digital Hub Application Programming Interface (API), an HTTP service layer for CMP for subscriber provisioning, SIM lifecycle management, and account management.

1.1 API Overview

The WING Digital Hub API is organized around REST. Our API has predictable resource-oriented URLs, accepts JSON request bodies, returns JSON-encoded responses, and uses standard HTTP response codes, authentication, and verbs.

All the API resources are accessible with an access token. The process of acquiring an access token is described in the [API Authentication](#) section.

WING Digital Hub uses conventional HTTP response codes to indicate the success or failure of an API request. In general:

- Codes in the 2xx range indicate success.
- Codes in the 4xx range indicate an error that failed given the information provided (e.g., a required parameter was omitted, a charge failed, etc.).
- Codes in the 5xx range indicate an error with WING Digital Hub's servers.

1.2 Execution Environment

The WING Digital Hub API is offered to consumers through an API Gateway. You do not require any specific software or SDK from Nokia to access API Gateway. An application developer may use standard HTTP protocol using any of the standard libraries such as cURL, Axios (Nodejs), or OkHttp (java). WING Digital Hub does not put any restriction on the software to be used for accessing the API.

1.3 API Resources

The fundamental concept in any REST API is the resource. A resource is an object with a type, associated data, relationships to other resources, and a set of methods that operate on it. It is similar to an object instance in an object-oriented programming language, with the important difference that only a few standard methods are defined for the resource (corresponding to the standard HTTP GET, POST, PUT, and DELETE methods), while an object instance typically has many methods.

The WING Digital Hub API is modelled as a collection of resources to handle:

- SIM provisioning
- SIM lifecycle
- Account management

Each of the resource may have a sub-resource or sub-collection.

A single resource is homogeneous and have a set of associated sub-resources to address a specific business function such as 'account management'.

A resource is identified by a URL. This URL may also be referred to as parent resource to handle functions related to account management.

E.g.: <http://{tenant}.nokiawing.com/api/{version}/accounts>

A sub-resource can be identified by another URL endpoint that extends from the parent resource.

E.g.: <http://{tenant}.nokiawing.com/api/{version}/accounts/account>

Chapter 2

Authentication API

NOKIA

2 Authentication API

All API requests are authenticated using an access token. You can get the access token by providing Client ID. The valid values for these attributes will be provided to you at the time of signing up for the WING Digital Hub API. You will exchange the "client id" for a long-lived access token.

API Interface		Authorization Token
URL	https://{baseURL}/uam/auth/realms/{realmID}/protocol/openid-connect/token	
Request	Method: POST, Content type: application/x-www-form-urlencoded	
	body	grant_type=password scope=openid client_id={client id} username={username} password={user password}
	header	None
Response	Content Type	Text
HTTP Status	200 - OK	JWT token
	400 - Bad Request	The request was unacceptable, often due to missing a required parameter.
	401 - Unauthorized	No valid API key provided.
	403 - Forbidden	The API key does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the /uam/auth/realms/{realmID}/protocol/openid-connect/token endpoint. Replace {username}, {password}, {client id}, and {realmID} with your information.</p>		

API Interface	Authorization Token
<p>Example:</p> <pre>curl -location -request POST 'https://{baseURL}/uam/auth/realms/{realmID}/protocol/openid-connect/token' \ --header 'Content-Type: application/x-www-form-urlencoded' \ --data-urlencode 'scope=openid' \ --data-urlencode 'client_id=web-app' \ --data-urlencode 'grant_type=password' \ --data-urlencode 'username=<username>' \ --data-urlencode 'password=<password>'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
username	8-16 character string	Mandatory	The value is provided to API users
password	8-16 character string	Mandatory	API user receives through email and needs to be reset by logging into WING Digital Hub portal
client_id	8-16 character string	Mandatory	Provided by WING Digital Hub support team at the time of signup
realmID	8-16 character string	Mandatory	Provided by WING Digital Hub support team at the time of tenant creation

Chapter 3

User Management API

NOKIA

3 User Management API

The WING Digital Hub platform provides a service where different enterprise customers, or operators can manage users and user-groups for various IoT services.

The following section specifies the API for User management. The root URL resource for all user management functions is:

<https://{baseUrl}/api/{version}/users/>

{baseUrl} example: wdh-sitstg2.nokiawing.com

{version} example: v1

All other sub-resources help you manage functions such as user creation, modification, and querying.

3.1 User Query API

Description:

This API can be used to fetch a user based on a search criteria. The search criteria can be used with any parameters specified in the Parameters table of this section.

API Interface	Fetch Users	
URL	https://{baseUrl}/api/{version}/users/users/{realmId}/user?page=0&size=50	
Request	Method: GET, Content type: application/json	
	Path variables	realmId = <tenant-code/realm-id>
	Query Parameters	Paging params (page=0&size=50)
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
header	'X-Total-Count: <total records>'	
HTTP Status	200 - OK	[{ "id": "string", "createdTimestamp": 0,

API Interface	Fetch Users	
		<pre>"defaultLanguage": "string", "email": "string", "emailVerified": boolean, "enabled": boolean, "firstName": "string", "lastName": "string", "userCategory": "ACCOUNT", "username": "string" }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the /users.</p> <p>Query Users API is generic API</p> <p>"userType" represents one of the possible values; ACCOUNT, GROUP</p>		
<p>Example:</p> <pre>curl -location - request GET 'https://{baseUrl}/api/{version}/users/users/wdh-sitstg2/user?page=0&size=50' - header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.2 Fetch Users by User Category API

Description:

This API can be used to fetch users by user-category.

API Interface	Fetch Users	
URL	https://{baseUrl}/api/{version}/users/users/find-by-category/{userCategory}	
Request	Method: GET, Content type: application/json	
	Path variables	userCategory= <ACCOUNT/GROUP>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": "string", "createdTimestamp": 0, "defaultLanguage": "string", "email": "string", "emailVerified": boolean, "enabled": boolean, "firstName": "string", "lastName": "string", "userCategory": "ACCOUNT/GROUP", "username": "string" }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the /users.		
Query Users API is generic API		
"userType" represents one of the possible values; ACCOUNT, GROUP.		

API Interface	Fetch Users
<p>Example:</p> <pre>curl -location - request GET 'https://{baseUrl}/api/{version}/users/users/find-by-category/ACCOUNT' -header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request.
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request.

3.3 Create User API

Description:

This API can be used to create a user.

API Interface	Create User	
URL	https://{baseUrl}/api/{version}/users/users/{realmId}/user	
Request	Method: POST, Content type: application/json	
	Path variables	realmId = <tenant-code/realm-id>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "username": "string", "firstName": "string", "lastName": "string", "userCategory": "ACCOUNT/GROUP", "defaultLanguage": "string", "email": "string", "emailVerified": boolean,

API Interface		Create User
		<pre>"enabled": boolean, " userGroupId": "string" }</pre> <p>Note: All fields are mandatory.</p>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": "string", "createdTimestamp": 0, "defaultLanguage": "string", "email": "string", "emailVerified": boolean, "enabled": boolean, "firstName": "string", "lastName": "string", "userCategory": "ACCOUNT/GROUP ", "username": "string" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the /users.</p> <p>"userCategory" represents one of the possible values; ACCOUNT, GROUP.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.4 Update User API

Description:

This API can be used to update user details.

API Interface	Update User	
URL	https://{baseUrl}/api/{version}/users/users/{realmId}/user/{userId}	
Request	Method: PUT, Content type: application/json	
	Path variables	realmId= <tenant-code/realm-id> userId= <userId>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "username": "string", "firstName": "string", "lastName": "string", "userCategory": "ACCOUNT/GROUP", "defaultLanguage": "string", "email": "string", "emailVerified": boolean, "enabled": boolean } Note: All fields are mandatory.
Response	Content Type	application/json
HTTP Status	200 - OK	{ id: "string", createdTimestamp: 0, defaultLanguage: "string", email: "string", emailVerified: boolean, enabled: boolean, firstName: "string", lastName: "string", userCategory: "ACCOUNT/GROUP", username: "string" }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface		Update User
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the /users.</p> <p>"userCategory" represents one of the possible values: ACCOUNT, GROUP.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.5 Fetch All User-Group Mapping by User API

Description:

This API can be used to fetch user-group mapping by user.

API Interface		Fetch User-Group Mapping
URL	https://{baseUrl}/api/{version}/users/users/user/{userId}/groups	
Request	Method: GET, Content type: application/json	
	Path variables	userId=<userId>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "userGroup": { "id": "string", "name": "string", "description": "string", "userGroupCategory": "< ACCOUNT/GROUP>", "dateCreated": "string<ISO_8601_FORMAT>" }]

API Interface		Fetch User-Group Mapping
		<pre> }, "roles":{ "id": "string", "name": "string", "description": "string", "dateCreated": "string<ISO_8601_FORMAT>", "roleCategory": "<ACCOUNT/ACCOUNT_ADMIN>" }, "accounts": [{ "accountId": "long", "parentAccountId": "long", "billingAccountId": "long", "tenantId": "string", "accountName": "string", "accountState": "string", "accountType": "string" }] }] </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the /users.</p> <p>"userGroupCategory" represents one of the possible values; ACCOUNT, GROUP.</p> <p>"roleCategory" represents one of the possible values: ACCOUNT, ACCOUNT_ADMIN.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	<p>The value is obtained as token by using the "Authentication API"</p> <p>This parameter is used in HTTP header of the request.</p>

Parameter	Type	Requirement	Description
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.6 Fetch User-Groups API

Description:

This API can be used to fetch user-groups.

API Interface	Fetch User-Groups	
URL	https://{baseUrl}/api/{version}/users/user-groups/{realmId}?page=0&size=50	
Request	Method: GET, Content type: application/json	
	Path variables	realmId = <tenant-code/realm-id>
	Query Parameters	Paging params (page=0&size=50)
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": "string", "name": "string", "userGroupCategory": " /ACCOUNT/GROUP", "description": "string", "dateCreated": "string<ISO_8601_FORMAT>", "allAccountSelected": "boolean", "account": "All/Multiple/Account-Name", }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

API Interface	Fetch User-Groups
<p>Notes:</p> <p>Send a GET request to the /users/user-groups.</p> <p>Query User-Groups API is generic API</p> <p>“userGroupCategory” represents one of the possible values: ACCOUNT.</p> <p>“account” must have one of the possible values.</p> <ol style="list-style-type: none"> 1. “allAccountSelected” is true 2. Account-Name for Account User 	
<p>Example:</p> <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/users/user-groups/wdh-sitstg2?page=0&size=1000' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'ContentType: application/json'--header 'Account-Context-Id: <ACCOUNT_ID>'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request.
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request.

3.7 Fetch User-Groups by User-Group Category API

Description:

This API can be used to fetch user-groups by user-group category.

API Interface	Fetch User-Groups by User-Group Category	
URL	https://{baseUrl}/api/{version}/users/user-groups/find-by-category/{userGroupCategory}	
Request	Method: GET, Content type: application/json	
	Path variables	userGroupCategory=< ACCOUNT>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Fetch User-Groups by User-Group Category	
HTTP Status	200 - OK	[{ "id": "string", "name": "string", "description": "string" "userGroupCategory": "< ACCOUNT>", "dateCreated": "string<ISO_8601_FORMAT>" }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the /user/user-groups.</p> <p>"userGroupCategory" represents one of the possible values: ACCOUNT.</p>		
<p>Example:</p> <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/users/user-groups/find-by-category/ACCOUNT' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'ContentType: application/json'--header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.8 Create User-Group API

Description:

This API can be used to create a user-group.

API Interface		Create User-Group
URL	https://{baseURL}/api/{version}/users/user-groups	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	<pre>{ "id": "string", "name": "string", "description": "string", "userGroupCategory": "< ACCOUNT>", "selectAllAccount": "boolean", "roleId": "string", "accountIds": ["accountId1", "accountId2"], "userIds": ["userId1", "userId2"] }</pre> <p>Note:</p> <ol style="list-style-type: none"> 1. All fields are mandatory. 2. If "selectAllAccount" is true, then "accountIds" must be empty array
Response	Content Type	application/json
HTTP Status	200 - OK	"userGroupId<string>"
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the /users/user-groups.</p> <p>"userGroupCategory" represents one of the possible values; ACCOUNT.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request.
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request.

3.9 Update User-Group API

Description:

This API can be used to update a user-group.

API Interface	Update User-Group	
URL	https://{baseUrl}/api/{version}/users/user-groups	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	<pre>{ "id": "string", "name": "string", "description": "string", "userGroupCategory": "<ACCOUNT>", "selectAllAccount": "boolean", "roleId": "string", "accountIds": ["accountId1", "accountId2"], "userIds": ["userId1", "userId2"] }</pre> <p>Note:</p> <ol style="list-style-type: none"> 1. All fields are mandatory. 2. If “selectAllAccount” is true, then “accountIds” must be empty array.
Response	Content Type	application/json
HTTP Status	200 - OK	“userGroupId<string>”
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Update User-Group	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the /users/user-groups.</p> <p>"userGroupCategory" represents one of the possible values; ACCOUNT.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.10 Add Accounts to User-Group API

Description:

This API can be used to add accounts to a user-group.

API Interface	Add Accounts to User-Group	
URL	https://{baseUrl}/api/{version}/users/user-groups/{realmId}/{userGroupId}/accounts	
Request	Method: POST, Content type: application/json	
	Path variables	realmId = <realmId/tenantCode> userGroupId = <userGroupId>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountIds": ["accountId1", "accountId2"] }

API Interface	Add Accounts to User-Group	
Response	Content Type	application/json
HTTP Status	200 - OK	"OK<string>"
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.11 Fetch Roles API

Description:

This API can be used to fetch roles.

API Interface	Fetch Roles	
URL	https://{baseUrl}/api/{version}/users/roles/{realmId}/role?page=0&size=50	
Request	Method: GET, Content type: application/json	
	Path variables	realmId = <tenant-code/realm-id>
	Query Parameters	Paging params (page=0&size=50)
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": "string", "name": "string", "roleCategory": "ACCOUNT/ACCOUNT_ADMIN", "description": "string", "dateCreated": "string<ISO_8601_FORMAT>", "accountName": "string" }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the /users/roles . Query Roles API is generic API		
"roleCategory" represents one of the possible values; ACCOUNT, ACCOUNT_ADMIN. "account" must have one of the possible value;		
<ol style="list-style-type: none"> "allAccountSelected" is true Account-Name for Account User 		

API Interface	Fetch Roles
Example: <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/users/roles/wdh-sitstg2/role?page=0&size=1000' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'ContentType: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request.
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request.

3.12 Fetch Roles by Role-Group Category API

Description:

This API can be used to fetch roles.

API Interface	Fetch Roles by Role-Group Category	
URL	https://{baseUrl}/api/{version}/users/roles/find-by-category/{rolesCategory}	
Request	Method: GET, Content type: application/json	
	Path variables	rolesCategory= <ACCOUNT/ACCOUNT_ADMIN>
	Query Parameters	Paging params (page=0&size=50)
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": "string", "name": "string", "description": "string", "roleCategory": "<ACCOUNT>", "dateCreated": "string<ISO_8601_FORMAT>" }]

API Interface	Fetch Roles by Role-Group Category	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the /users/roles.</p> <p>"roleCategory" represents one of the possible values; ACCOUNT, ACCOUNT_ADMIN.</p>		
<p>Example:</p> <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/users/roles/find-by-category/ACCOUNT' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'ContentType: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.13 Create Role API

Description:

This API can be used to create a role.

API Interface		Create Role
URL	https://{baseUrl}/api/{version}/users/roles/{realmId}/role	
Request	Method: POST, Content type: application/json	
	Path variables	realmId= <tenant-code/realm-id>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	<pre>{ "name": "string", "description": "string", "roleCategory": "<ACCOUNT>", "accountId": "long" "permissionScope": [{ "scopeType": "acc-mgmt", "permissions": [{ "permissionGrantedFor": "string", "requestPath": "string", "serviceCategory": "string", "serviceMasterId": "Long", "antPathPattern": "string", "permissionScopes": ["READ", "WRITE", "DELETE"] }] }] }</pre> <p>Note: All fields are mandatory</p>
Response	Content Type	application/json
HTTP Status	200 - OK	"roleId<string>"
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Create Role	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a POST request to the /users/roles . "roleCategory" represents one of the possible values: ACCOUNT.		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.14 Update Role API

Description:

This API can be used to update a role.

API Interface	Update Role	
URL	https://{baseUrl}/api/{version}/users/roles/{realmId}/role	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "string", "description": "string", "roleCategory": "<ACCOUNT>", "accountId": "long" }
		Note: All fields are mandatory.
Response	Content Type	application/json

API Interface	Update Role	
HTTP Status	200 - OK	"roleId<string>"
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the /users/roles.</p> <p>"roleCategory" represents one of the possible values; ACCOUNT.</p>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the "Authentication API" This parameter is used in HTTP header of the request.
Content-Type	Fixed character value "Content-Type"	Mandatory	This parameter is used in HTTP header of the request.

3.15 Fetch Service-Permission API

Description:

This API can be used to fetch service permission.

API Interface	Fetch Service-Permission	
URL	https://{baseUrl}/api/{version}/users/service-permissions?roleCategory={roleCategory}	
Request	Method: GET, Content type: application/json	
	Query Parameters	RoleCategory must be ACCOUNT
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": "long", "name": "string", "active": "boolean", "description": "string", "serviceProfileMap": [{ "serviceMasterId": "long", "active": "true", "name": "string", "serviceCategory": "string", "requestPath": "string", "recordType": "string", "seqNo": "integer", "antPathPattern": "string" }] }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a GET request to the /users/service-permissions .		
Example:		

API Interface	Fetch Service-Permission
<pre>curl -location -request GET 'https://{baseUrl}/api/{version}/users/service-permissions' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: *'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request.
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request.

New APIs – FEB 13

3.16

Get User Details

Description:

This API can be used to get User Details.

API Interface	Get User Details	
URL	https://{baseUrl}/api/{Version}/users/users/{realmId}/user/{userId}	
Request	Method: GET	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": "", "createdTimestamp": "", // Long "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false",

API Interface	Get User Details	
		<pre>"enabled": "true/false", "userCategory": "ACCOUNT", "accountName": "", "defaultLanguage": "English" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

3.17

Get All User Details

Description:

This API can be used to get All User Details.

API Interface	Get All User Details	
URL	https://{baseURL}/api/{Version}/users/users/{realmId}/user	
Request	Method: GET	
	Header	<pre>'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": "", "createdTimestamp": "", // Long "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false", "enabled": "true/false", "userCategory": "ACCOUNT", "accountName": "", </pre>

API Interface	Get All User Details	
		"defaultLanguage": "English" }}]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

3.18

Create User API

Description:

This API can be used to create a user.

API Interface	Create User	
URL	https://{baseUrl}/api/{Version}/users/users/{realmId}/user	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false", "enabled": "true/false", "userCategory": "ACCOUNT", "userGroupId": "", "defaultLanguage": "English" }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": "",

API Interface		Create User
		<pre>"createdTimestamp": "", // Long "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false", "enabled": "true/false", "userCategory": "ACCOUNT", "accountName": "", "defaultLanguage": "English" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

3.19

Edit User Details

Description:

This API can be used to update user details.

API Interface		Edit User Details
URL	https://{baseURL}/api/{Version}/users/users/{realmId}/user/{userId}	
Request	Method: PUT, Content type: application/json	
	header	<pre>'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'</pre>
	body	<pre>{ "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false", "enabled": "true/false",</pre>

API Interface		Edit User Details
		<pre>"userCategory": "ACCOUNT", "userGroupld": "", "defaultLanguage": "English" }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": "", "createdTimestamp": "", // Long "username": "", "firstName": "", "lastName": "", "email": "", "emailVerified": "true/false", "enabled": "true/false", "userCategory": "ACCOUNT", "accountName": "", "defaultLanguage": "English" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

3.20 Reset User Password

Description:

This API can be used to reset user password.

API Interface		Reset User Password
URL	https://{baseUrl}/api/{Version}/users/users/{realmId}/user/{userId}/reset-password	
Request	Method: POST, Content type: application/json	
	header	<pre>'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'</pre>

API Interface	Reset User Password	
	body	{ "password": "base64String", "temporary": false, }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "userId": "c74180f3-0042-4844-bf61-782e2ee8ef8b", "timestamp": "2023-02-08T03:37:58.371707100Z" } Data Types String userId; String timestamp; //utc date in iso-8601
	400 - Bad Request	The request was unacceptable, often due to missing a required parameter.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

3.21 Delete User

Description:

This API can be used to delete a user.

API Interface	Delete User
URL	https://{baseURL}/api/{Version}/users/users/{realmId}/user/{userId}/delete-user
Request	Method: DELETE, Content type: application/json

API Interface	Delete User	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "userId": "c74180f3-0042-4844-bf61-782e2ee8ef8b", "status": "success" }
		Data Types String userId; String status; // success or failed String reason; // in case of failure
	204 No Content	Cannot use existing API, as Jasper API require response.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 4

Account Management

NOKIA

The background of the slide features a vibrant blue gradient. On the left side, there is a vertical dark blue bar. The bottom half of the slide is dominated by a complex, abstract graphic of overlapping, semi-transparent white and light blue lines that flow and curve across the space, creating a sense of motion and depth.

4 Account Management API

The WING Digital Hub platform has an account hierarchy feature to manage the IoT services used by the user according to the business requirement.

This account hierarchy not only provides functionality to govern enterprise customers, but also supports in onboarding the new enterprises.

The following section specifies the API for account management. The root URL resource for all account management functions is:

<https://{baseUrl}/api/{version}/accounts/>

{baseUrl} example: wdh-sitstg2.nokiawing.com

{version} example: v1

All other sub-resources help you manage functions such as account creation, modification, and querying.

4.1 Account Query API

Description:

This API can be used to fetch accounts based on a filter criteria. The filter criteria can be used with any parameters specified in the Parameters table of this section.

API Interface	Fetch Accounts	
URL	https://{baseUrl}/api/{version}/accounts/account	
Request	Method: GET, Content type: application/json	
	Path variables	name.equals=<account name>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "extId": "string", "id": 0,

API Interface	Fetch Accounts	
		<pre> "name": "string", "accountType": "INDIVIDUAL", "accountState": "DRAFT", "billingAccountId": 0, "parentAccountId": 0, "address": { "accountMasterId": 0, "addressLine1": "string", "addressLine2": "string", "city": "string", "country": "string", "extId": "string", "id": 0, "isDefault": true, "postcode": "string", "state": "string", }, "contact": { "accountMasterId": 0, "email": "string", "extId": "string", "firstName": "string", "id": 0, "isDefault": true, "lastName": "string", "phone": "string", }, "custFields": { "additionalProp1": "string", "additionalProp2": "string", "additionalProp3": "string" } }] </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Fetch Accounts	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/account</i>.</p> <p>Query Account API is generic API and WING Digital Hub provides multiple combinations of query parameters to search the results.</p>		
<p>Example:</p> <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/accounts/account?name.equals=<account name>' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
Authorization: Bearer	1024 – 4096 character string	Mandatory	The value is obtained as token by using the “Authentication API” This parameter is used in HTTP header of the request
Content-Type	Fixed character value “Content-Type”	Mandatory	This parameter is used in HTTP header of the request

4.2 Create Billing Profile for Account API

Description:

This API can be used to create billing profile, which can be used to create a new account.

API Interface	Account Billing Profile
URL	https://{baseUrl}/api/{version}/rating/account-billing-profiles
Request	Method: POST, Content type: application/json

API Interface		Account Billing Profile
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "billcycleId": 1155, "currencyId": 1005, "creditLimit": 0, "billaddressId": 1401, "id": null, "ratingType": "PRORATED RETROACTIVE", "mrcChargeType": "IN ADVANCE IN ARREAR", "mrcRatingType": "FULL PRORATED", "tenantId": 1 }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 105080, "tenantId": "1", "mrcChargeType": "IN ADVANCE IN ARREAR ", "ratingType": "PRORATED RETROACTIVE ", "creditLimit": 0, "mrcRatingType": "FULL PRORATED ", "billcycleId": 1155, "billaddressId": 1401, "currencyId": 1005 }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.3 Account Creation API

Description:

This API can be used to create a new account. The account can be a parent account in the account hierarchy or can be a child of an existing account.

API Interface	Create Account	
URL	https://{baseUrl}/api/{version}/accounts/account	
Request	Method: POST, Content type: application/json	
	body	<pre> { "id": null, "accountState": "DRAFT", "accountType": "ENTERPRISE RESELLER", "address": { "accountMasterId": null, "addressLine1": "string", "addressLine2": "string", "city": "string", "country": "string", "extId": "", "id": null, "isDefault": true, "postcode": "string", "state": "string", "tenantId": null }, "contact": { "accountMasterId": null, "email": "string", "firstName": "string", "id": null, "isDefault": null, "lastName": "string", "phone": "string", "tenantId": null }, "parentAccountId": 0, "name": " Demo create account1", "tenantId": "21", </pre>

API Interface		Create Account
		"billingAccountId": 49506 }
	header	'Authorization: Bearer <ACCESS_TOKEN>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 4376, "extId": null, "name": "Demo create account1", "accountType": "ENTERPRISE RESELLER", "accountState": "DRAFT", "billingAccountId": 49506, "custFields": {}, "parentAccountId": null, "customFields": [{ "id": 1409, "value": " " }], { "id": 1505, "value": " " }], { "id": 2301, "value": " " }], { "id": 2302, "value": " " }], "address": { "id": 4364, "extId": null, "addressLine1": "string", "addressLine2": "string", "state": "string", "city": "string", "postcode": "string", "country": "string", "isDefault": true, "accountMasterId": 4376 } }

API Interface	Create Account	
		<pre> }, "contact": { "id": 4360, "extId": null, "firstName": "string", "lastName": "string", "email": "string", "phone": "string", "isDefault": true, "accountMasterId": 4376 } } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the <code>/account</code>. Replace body with your information.</p>		
<p>Example:</p> <pre> curl -location -request POST 'https://{baseUrl}/api/{version}/accounts/account' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{{"extId": "EXT22", "name": "NTT_capacity 2", "accountType": "ENTERPRISE", "accountState": "DRAFT", "billingAccountId": integer, "custFields": {"prop2": "value2", "prop1": "value1", "prop3": "value3"}, "parentAccountId": null, "address": {"extId": "string", "addressLine1": "string", "addressLine2": "string", "state": "string", "city": "string", "postcode": "string", "country": "string", "isDefault": true, "accountMasterId": 0}, "contact": {"extId": "string", "firstName": "string", "lastName": "string", "email": "string", "phone": "<phone-number>", "isDefault": true, "accountMasterId": 0}}' </pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
accountType	String	Mandatory	One of the values - {ENTERPRISE RESELLER}

Parameter	Type	Requirement	Description
accountState	String	Mandatory	{DRAFT ACTIVE SUSPEND RETIRED}
name	String	Mandatory	Name of the account
parentAccountId	Number	Optional	Id of the parent account used while creating the sub-account
address	Object	Optional	Address details
contact	Object	Optional	Contact details
custFields	Object	Optional	Custom fields as key value pairs in JSON format
billingAccountId	Integer	Mandatory	Use the same billing account ID which is used to create the account (See Section 3.2)

4.4 Custom Fields for Accounts API

4.4.1 Create Custom Fields for Accounts

Description:

This API can be used to create custom fields for accounts.

API Interface	Create Custom Fields for Accounts	
URL	https://{baseUrl}/api/{version}/accounts/accounts/customfield	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "Test custom field1", "description": "Create test custom field", "type": "Text/Number/Date/Time/Time Stamp/(True/False)/Enumeration", "isPropagated": true/false }
Response	Content Type	application/json

API Interface		Create Custom Fields for Accounts
HTTP Status	201 - Created	<pre>{ "id": 1554, "name": "Test custom field1", "type": "Text/Number/Time/TimeStamp/(True/False)/Enumeration)", "tenantId": "21", "description": "Create test custom field", "isPropagated": true/false, "accountId": "3977", "userId": "1bc17bfa-ad94-47ef-b750-259ca369161c", "creationTimestamp": "2022-05-04T13:03:23", "modificationTimestamp": "2022-05-04T13:03:23" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.4.2 Edit Custom Fields for Accounts

Description:

This API can be used to edit custom fields for accounts.

API Interface		Edit Custom Fields for Accounts
URL	https://{baseURL}/api/{version}/accounts/accounts/customfield	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'

API Interface		Edit Custom Fields for Accounts
	body	<pre>{ "name": "Test custom field 2", "description": "Update of Custom Field", "type": Text/Number/Time/TimeStamp/(True/False)/Enumeration)", "isPropagated": true/false, "id": 1554 }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": 1554, "name": "Test custom field 2", "type": "Text/Number/Time/TimeStamp/(True/False)/Enumeration)", "tenantId": "21", "description": "Update of Custom Field", "isPropagated": true/false, "accountId": "3977", "userId": "1bc17bfa-ad94-47ef-b750-259ca369161c", "creationTimestamp": "2022-05-04T13:03:23", "modificationTimestamp": "2022-05-04T13:03:23" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.4.3 Delete Custom Fields for Accounts

Description:

This API can be used to delete custom fields for accounts.

API Interface	Delete Custom Fields for Accounts	
URL	https://{baseUrl}/api/{version}/accounts/accounts/customfield/{customFieldId}	
Request	Method: DELETE, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	Deleted custom field successfully.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.4.4 Update Custom Fields for Accounts

Description:

This API can be used to update custom fields for accounts.

API Interface	Update Custom Fields for Accounts	
URL	https://{baseUrl}/api/{version}/accounts/accounts/customfield/updateAccountCustomField/{customFieldId}	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": 1551, "name": "Update custom filed", "type": "Text/Number/Time/TimeStamp/(True/False)/Enumeration", "value": "" }
Response	Content Type	application/json

API Interface	Update Custom Fields for Accounts	
HTTP Status	200 - OK	Custom Field Updated Successfully
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.5 Account Update API

Description:

This API can be used to modify the details of an account. Except for account ID, all other fields can be updated using the API.

API Interface	Update Account	
URL	https://{baseURL}/api/{version}/accounts/account	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface	Update Account	
	body	<pre>{ "accountState": "{DRAFT ACTIVE SUSPEND RETIRED}", "accountType": "INDIVIDUAL ENTERPRISE RESELLER", "billingAccountId": 0, "customFields": [{ "id": 4958, "value": " " }, { "id": 5015, "value": " " }, { "id": 5101, "value": " " }, { "id": 5060, "value": " " }], "extId": "string", "id": {accountId for modification}, "name": "string", "parentAccountId": 0 }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "accountState": "DRAFT", "accountType": "INDIVIDUAL", "billingAccountId": 0, "customFields": [{ "id": 4958, "value": " " }, { "id": 5015, "value": " " }, { "id": 5101, "value": " " }, { "id": 5060,</pre>

API Interface	Update Account	
		<pre> "value": " " }, "extId": "string", "id": 0, "name": "string", "parentAccountId": 0 } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the <i>/account</i>. Replace body with your information.</p>		

4.5.1 Update Address API

Description:

This API can be used to update the address details of an account.

API Interface	Update Address of an Account	
URL	https://{baseURL}/api/{version}/accounts/account/{accountId}/addresses	
Request	Method: PATCH, Content type: application/json	
	header	<pre> 'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>' </pre>

API Interface		Update Address of an Account
	body	<pre>{ "id": integer, "addressLine1": "string", "addressLine2": "string", "state": "string", "city": "string", "postcode": "string", "country": "string", "isDefault": boolean, }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": integer, "extId": "string", "addressLine1": "string", "addressLine2": "string", "state": "string", "city": "string", "postcode": "string", "country": "string", "isDefault": boolean, "accountMasterId": integer }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PATCH request to the <code>/account</code>. Replace body with your information.</p>		

API Interface	Update Address of an Account
<p>Example:</p> <pre>curl -location -request PUT 'https://{baseUrl}/api/{version}/accounts/account/{accountId}/addresses' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{"id": integer, "extId": "string", "addressLine1": "string", "addressLine2": "string", "state": "string", "city": "string", "postcode": "string", "country": "string", "isDefault": boolean, "accountMasterId": integer}'</pre>	

4.5.2 Update Contact API

Description:

This API can be used to update the contact details of an account.

API Interface	Update Contact of an Account	
URL	https://{baseUrl}/api/{version}/accounts/account/{accountId}/contacts	
Request	Method: PATCH, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": integer, "firstName": "string", "lastName": "string", "email": "string", "phone": "string", "isDefault": boolean, }
Response	Content Type	application/json

API Interface	Update Contact of an Account	
HTTP Status	200 - OK	{ "id": integer, "extId": "string", "firstName": "string", "lastName": "string", "email": "string", "phone": "string", "isDefault": boolean, "accountMasterId": integer }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a PATCH request to the <i>/account</i> . Replace body with your information.		
Example:		
<pre>curl -location -request PUT 'https://{baseUrl}/api/{version}/accounts/account/{accountId}/contacts' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{"id": integer,"extId": "string","firstName": "string", "lastName": "string","email": "string","phone": "string","isDefault": boolean,"accountMasterId": integer}'</pre>		

4.6 Account Fetch API

Description:

This API can be used to access the details of a given account.

API Interface	Account Fetch API by ID
URL	https://{baseUrl}/api/{version}/accounts/account/{id}

API Interface		Account Fetch API by ID
Request	Method: GET, Content type: application/json	
	Path variable	id = account id
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "extId": "string", "id": {id}, "name": "string", "accountType": "INDIVIDUAL", "accountState": "DRAFT", "billingAccountId": 0, "parentAccountId": 0, "address": { "accountMasterId": 0, "addressLine1": "string", "addressLine2": "string", "city": "string", "country": "string", "extId": "string", "id": 0, "isDefault": true, "postcode": "string", "state": "string" }, "contact": { "accountMasterId": 0, "email": "string", "extId": "string", "firstName": "string", "id": 0, "isDefault": true, "lastName": "string", "phone": "string" }, "customFields": [{ "id": 4958, "value": " "</pre>

API Interface	Account Fetch API by ID	
		<pre> }, { "id": 5015, "value": " " }, { "id": 5101, "value": " " }, { "id": 5060, "value": " " }], } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the <code>/account{id}</code> . Replace {id} with your information.		
Example:		
<pre> curl -location -request GET 'https://{baseURL}/api/{version}/accounts/account/<account-id>' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre>		

4.7 Account Delete API

Description:

This API can be used to delete an account. The account can only be deleted in draft state, before assigning any resources.

API Interface	Account Delete API
URL	https://{baseURL}/api/version/accounts/account/4906

API Interface	Account Delete API	
Request	Method: DELETE, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	204 – No Content	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.8 Assign APN to Account

Description:

This API can be used to assign an APN to an account.

API Interface	Assign APN to Account	
URL	https://{baseUrl}/api/{version}/accounts/assign_apn	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": 3741, "tenantId": "21", "resourceType": "APN", "effectiveDate": "2022-05-02T07:39:18.058Z", "expirationDate": "9999-12-31T23:59:59.999Z", "apns": [1094209] }

API Interface	Assign APN to Account	
Response	Content Type	Text
HTTP Status	200 - OK	43f8fc23-e211-4d98-9a25-19f0654a7f94
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.9 Read APNs Assigned to Account

Description:

This supporting API is used to fetch the assigned APN from the account. You can read the APNs assigned to account using this API.

API Interface	Read APNs Assigned to Account	
URL	https://{baseURL}/api/{version}/accounts/account/{AccountID}/resources?resourceType.equals=APN	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Read APNs Assigned to Account	
HTTP Status	200 - OK	<pre>[{ "id": 6477, "resourceType": "APN", "resourceId": 3512802, "effectiveDate": "2022-04-14T14:29:18.253Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacelId": 1584852 }, { "id": 6478, "resourceType": "APN", "resourceId": 3512805, "effectiveDate": "2022-04-14T14:29:18.253Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacelId": 1584852 }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.10 Assign Network Profile to Account

Description:

This API can be used to assign a network profile to an account.

API Interface		Assign Network Profile to Account
URL	https://{baseUrl}/api/{version}/accounts/assign_networkprofile	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": 3992, "tenantId": "21", "resourceType": "SERVICE-PROFILE", "effectiveDate": "2022-05-02T10:44:39.369Z", "expirationDate": "9999-12-31T23:59:59.999Z", "serviceProfiles": [1088907] }
Response	Content Type	Text
HTTP Status	200 - OK	82837b0b-e339-40a7-bbd6-4965fffbde20
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.11 Set Default Network Profile to Account

Description:

After assigning network profile to an account, use this API to make the profile as default so that same profile can be picked while assigning subscriber to account.

API Interface		Set Default Network Profile to Account
URL	https://{baseUrl}/api/{version}/accounts/account/{AccountID}/resources	
Request	Method: PATCH, Content type: application/json	

API Interface		Set Default Network Profile to Account
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": 7127, "resourceId": 1088907, "resourceType": "SERVICE-PROFILE", "effectiveDate": "2022-05-02T10:44:39.369Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": true }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 7127, "resourceType": "SERVICE-PROFILE", "resourceId": 1088907, "effectiveDate": "2022-05-02T10:44:39.369Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": true, "accountMasterId": 3992, "networkInterfaceId": null }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.12 Read Network Profiles Assigned to Account

Description:

This supporting API is used to fetch the assigned network profile from the account. You can read the network profiles assigned to account using this API.

API Interface		Read Network Profiles Assigned to Account
URL	https://{baseUrl}/api/{version}/accounts/account/3921/resources?resourceType.equals=SERVICE-PROFILE	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": 6490, "resourceType": "SERVICE-PROFILE", "resourceId": 3552104, "effectiveDate": "2022-04-14T14:55:02.854Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacId": null }, { "id": 6491, "resourceType": "SERVICE-PROFILE", "resourceId": 3551304, "effectiveDate": "2022-04-14T14:55:02.854Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacId": null }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Read Network Profiles Assigned to Account	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.13 Assign Rate Plan to Account

Description:

This API can be used to assign a rate plan to an account.

API Interface	Assign Rate Plan to Account	
URL	https://{baseUrl}/api/{version}/accounts/account/3741/resources	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": null, "resourceType": "RATE-PLAN", "accountMasterId": 3741, "resourceId": 20855, "effectiveDate": "2022-05-02T09:50:11.424Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false }
Response	Content Type	application/json

API Interface	Assign Rate Plan to Account	
HTTP Status	200 - OK	{ "id": 7124, "resourceType": "RATE-PLAN", "resourceId": 20855, "effectiveDate": "2022-05-02T09:50:11.424Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3741, "networkInterfaceld": null }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.14 Set Default Rate Plan to Account

Description:

After assigning rate plan to an account, use this API to make the profile as default so that same profile can be picked while assigning subscriber to account.

API Interface	Set Default Rate Plan to Account	
URL	https://{baseURL}/api/{version}/accounts/account/3741/resources	
Request	Method: PATCH, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface		Set Default Rate Plan to Account
	body	<pre>{ "id": 7123, "resourceId": 17893, "resourceType": "RATE-PLAN", "effectiveDate": "2022-05-02T08:57:17.049Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>{ "id": 7123, "resourceType": "RATE-PLAN", "resourceId": 17893, "effectiveDate": "2022-05-02T08:57:17.049Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3741, "networkInterfacelId": null }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.15 Read Rate Plans Assigned to Account

Description:

This supporting API is used to fetch the assigned rate plan from the account. You can read the rate plans assigned to account using this API.

API Interface		Read Rate Plans Assigned to Account
URL	https://{baseUrl}/api/{version}/accounts/account/3921/resources?resourceType.equals=RATE-PLAN	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>[{ "id": 7090, "resourceType": "RATE-PLAN", "resourceId": 3313, "effectiveDate": "2022-04-29T14:58:00.337Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacelId": null }, { "id": 6493, "resourceType": "RATE-PLAN", "resourceId": 18304, "effectiveDate": "2022-04-14T15:19:50.717Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacelId": null }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.16 Assign Roaming Profile to Account

Description:

This API can be used to assign a roaming profile to an account.

API Interface		Assign Roaming Profile to Account
URL	https://{baseUrl}/api/{version}/accounts/assign_roamingprofile	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": 3992, "resourceType": "ROAMING-PROFILE", "effectiveDate": "2022-05-02T10:36:44.101Z", "expirationDate": "9999-12-31T23:59:59.999Z", "roamingProfiles": [1089201] }
Response	Content Type	application/json
HTTP Status	200 - OK	34d37a7a-a01e-401c-89ca-25954123c63b
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.17 Set Default Roaming Profile to Account

Description:

After assigning roaming profile to an account, use this API to make the profile as default so that same profile can be picked while assigning subscriber to account.

API Interface		Set Default Roaming Profile to Account
URL	https://{baseURL}/api/{version}/accounts/account/3992/resources	
Request	Method: PATCH, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": 7126, "resourceId": 1089201, "resourceType": "ROAMING-PROFILE", "effectiveDate": "2022-05-02T10:36:44.101Z", "expirationDate": "9999-12-31T23:59:59.999Z", "networkInterfaceId": 1584852, "isDefault": true }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 7126, "resourceType": "ROAMING-PROFILE", "resourceId": 1089201, "effectiveDate": "2022-05-02T10:36:44.101Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": true, "accountMasterId": 3992, "networkInterfaceId": 1584852 }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.18 Read Roaming Profiles Assigned to Account

Description:

This supporting API is used to fetch the assigned roaming profiles from the account. You can read the roaming profiles assigned to account using this API.

API Interface		Read Roaming Profiles Assigned to Account
URL	https://{baseUrl}/api/{version}/accounts/account/3921/resources?resourceType.equals=ROAMING-PROFILE	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": 6499, "resourceType": "ROAMING-PROFILE", "resourceId": 1087253, "effectiveDate": "2022-04-14T15:21:14.551Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": false, "accountMasterId": 3921, "networkInterfacelId": null }, { "id": 6500, "resourceType": "ROAMING-PROFILE", "resourceId": 1091802, "effectiveDate": "2022-04-14T15:21:14.551Z", "expirationDate": "9999-12-31T23:59:59.999Z", "isDefault": true, "accountMasterId": 3921, "networkInterfacelId": 1584852 }]
	401 - Unauthorized	No valid JWT token provided.

API Interface	Read Roaming Profiles Assigned to Account	
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.19 Assign APN Group to Account

Description:

This API can be used to assign an APN group to an account.

API Interface	Assign APN Group to Account	
URL	https://{baseUrl}/api/{version}/accounts/address/3741/apnGroup	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "default": false, "apnGroupName": "overlay3", "apnIds": [7115] }
Response	Content Type	application/json

API Interface	Assign APN Group to Account	
HTTP Status	201 - OK	<pre> [["apnGroupId": 1671, "apnId": 7115, "apnGroupMappingId": 1553, "apnGroupName": "overlay2", "accountId": 3723, "effectiveDate": "2022-06-08T09:27:10.853825000", "expirationDate": null, "default": false]] </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.20 Set Default APN Group to Account

Description:

After assigning APN group to an account, use this API to make the profile as default so that same profile can be picked while assigning subscriber to account.

API Interface	Set Default APN Group to Account	
URL	https://{baseURL}/api/{version}/accounts/address/3793/apnGroup	
Request	Method: PUT, Content type: application/json	
	header	<pre> 'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>' </pre>

API Interface	Set Default APN Group to Account	
	body	{ "id": 1673, "apnGroupName": "OVERLAY2", "default": true }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 1673, "apnGroupName": "OVERLAY2", "accountId": 3793, "apnIds": [6130], "networkInterfaceld": 1584901, "default": true }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.21 Read APN Groups Assigned to Account

Description:

This supporting API is used to fetch the assigned APN groups from the account. You can read the APN groups assigned to account using this API.

API Interface	Read APN Groups Assigned to Account
URL	https://{baseURL}/api/{version}/accounts/address/3418/apnGroup
Request	Method: GET, Content type: application/json

API Interface		Read APN Groups Assigned to Account
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "id": 1385, "apnGroupName": "OVERLAY", "accountId": 3418, "apnIds": [5091], "networkInterfacelId": null, "default": false }, { "id": 1348, "apnGroupName": "oVERLAY", "accountId": 3418, "apnIds": [5091], "networkInterfacelId": null, "default": false }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.22 Fetch Account APN Group

Description:

This API can be used to access the details of APN group for an account.

API Interface		Fetch Account APN Group
URL	https://{baseUrl}/api/{version}/accounts/address/{id}/apnGroup	

API Interface		Fetch Account APN Group
Request	Method: GET, Content type: application/json	
	Path variable	id = account id
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre> { "id": 112, "apnGroupName": "APN_Group_2", "accountId": 78, "apnIds": [154, 156], "default": false }, { "id": 111, "apnGroupName": "APN_Group_1", "accountId": 78, "apnIds": [155], "default": true }] </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

API Interface	Fetch Account APN Group
Notes:	
Send a GET request to the <code>/address/{id}/apnGroup</code> . Replace {id} with your information.	
Example:	
<pre>curl -location -request GET 'https://{baseUrl}/api/{version}/accounts/address/<account-id>/apnGroup' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>'</pre>	

4.23 Create APN Group

Description:

This API can be used to create an APN group for an account.

API Interface	Create APN Group	
URL	https://{baseUrl}/api/{version}/accounts/address/{id}/apnGroup	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "default": true, "apnGroupName": "string", "apnIds": [1, 3, 4] }
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "accountId": 0, "apnGroupId": 0, "apnGroupMappingId": 0, "apnGroupName": "string", "apnId": 0, "default": true,

API Interface	Create APN Group	
		<pre>"effectiveDate": "2021-04-09T04:09:40.637Z", "expirationDate": "2021-04-09T04:09:40.637Z" }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a POST request to the <code>/address/{id}/apnGroup</code> . Replace {id} with your information.		
Example:		
<pre>curl -location -request POST 'https://{baseURL}/api/{version}/accounts/address/<account-id>/apnGroup' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '<Your data is in json format>'</pre>		

4.24 Update APN Group

Description:

This API can be used to update an APN group for an account.

API Interface	Update APN Group	
URL	https://{baseURL}/api/{version}/accounts/address/{id}/apnGroup	
Request	Method: PUT, Content type: application/json	
	header	<pre>'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'</pre>

API Interface		Update APN Group
	body	<pre>{ "id": [ID of the group to be updated] "default": true, "apnGroupName": "string", }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre>[{ "accountId": 0, "apnGroupId": 0, "apnGroupMappingId": 0, "apnGroupName": "string", "apnId": 0, "default": true, "effectiveDate": "2021-04-09T04:09:40.637Z", "expirationDate": "2021-04-09T04:09:40.637Z" }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the <i>/address/{id}/apnGroup</i>. Replace {id} with your account information.</p>		
<p>Example:</p> <pre>curl -location -request PUT 'https://{baseUrl}/api/{version}/accounts/address/<account-id>/apnGroup' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '<Your data is in json format>'</pre>		

4.25 Update APN Details for a Group

Description:

This API can be used to update an APN group by adding and removing APN IDs.

API Interface	Update APN Details for a Group	
URL	https://{baseUrl}/api/{version}/accounts/address/{id}/apnGroup/{apnGroupId}	
Request	Method: PATCH, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "addAPN": [0], "removeAPN": [0] }
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "accountId": 0, "apnGroupId": 0, "apnGroupMappingId": 0, "apnGroupName": "string", "apnId": 0, "default": true, "effectiveDate": "2021-04-09T04:09:40.637Z", "expirationDate": "2021-04-09T04:09:40.637Z" }]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface		Update APN Details for a Group
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PATCH request to the <code>/address/{id}/apnGroup/{apnGroupId}</code>. Replace {id} with your account information and {apnGroupId} with account group.</p>		
<p>Example:</p> <pre>curl -location -request PATCH 'https://{baseUrl}/api/{version}/accounts/address/<account-id>/apnGroup/{apnGroupId}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '<Your data is in json format>'</pre>		

4.26 Fetch APN Resource ID

Description:

This API can be used to access the details of APN Resource ID for a given APN group ID.

API Interface		Fetch APN Resource ID
URL	https://{baseUrl}/api/{version}/accounts/resources/{apnid}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 155, "resourceType": "APN", "resourceId": 70503, "effectiveDate": 1614326532.555000000, "expirationDate": 253402300799.999000000, "isDefault": false, "accountMasterId": 78 }

API Interface	Fetch APN Resource ID	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a GET request to the <i>/resources/{apnid}</i> . Replace {apnid} with your APN ID information.		
Example: <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/accounts/resources/<apnid>' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

4.27 Account Resource Query API

Description:

This API can be used to fetch resources based on an account and other filter criteria. The filter criteria can be used with any parameters specified in the Parameters table of this section.

API Interface	Account Resource Query API	
URL	https://{baseUrl}/api/{version}/accounts/resources	
Request	Method: GET, Content type: application/json	
	Path variables	accountMasterId.equals= <account id>
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[{ "accountMasterId": 0, "effectiveDate": "2021-03-25T02:09:06.963Z",

API Interface		Account Resource Query API
		<pre>"expirationDate": "2021-03-25T02:09:06.963Z", "id": 0, "isDefault": true, "resourceId": 0, "resourceType": "APN" }]</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/resources</i>.</p> <p>Query Account Resource Query API is generic API and WING Digital Hub provides multiple combinations of query parameters to search the results.</p>		
<p>Example:</p> <pre>curl -location -request GET 'https://{baseUrl}/api/{version}/accounts/resources?masterAccountid.equals=<account id>' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

4.28 Create Account Resource API

Description:

This API can be used to create account resources for a given account.

API Interface		Create Account Resource API
URL	https://{baseUrl}/api/{version}/accounts/resources/{accountId}	
Request	Method: POST, Content type: application/json	
	path	{accountId}

API Interface		Create Account Resource API
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "effectiveDate": "2021-03-25T02:17:08.572Z", "expirationDate": "2021-03-25T02:17:08.572Z", "isDefault": true, "resourceId": 0, "resourceType": "APN" }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "accountMasterId": 0, "effectiveDate": "2021-03-25T02:22:45.329Z", "expirationDate": "2021-03-25T02:22:45.329Z", "id": 0, "isDefault": true, "resourceId": 0, "resourceType": "APN" }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the <i>/resources/{accountId}</i>.</p> <p>Query Account Resource Query API is generic API and WING Digital Hub provides multiple combinations of query parameters to search the results.</p> <p>Example:</p> <pre>curl -location -request POST 'https://{baseURL}/api/{version}/accounts/resources/{accountId}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '<Your data in json format>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description
effectiveDate	Date	Mandatory	The date from which the resource is applicable for the account
expirationDate	Date	Mandatory	The date until which the resource is applicable for the account
isDefault	Boolean	Mandatory	To make a resource default for the account
resourceId	Integer	Mandatory	The resource ID
resourceType	String	Mandatory	One of the following list: [APN IP-POOL, RATE-PLAN SERVICE-PROFILE ROAMING-PROFILE SIM]

4.29 Update Account Resource API

Description:

This API can be used to update account resources for a given account.

API Interface	Update Account Resource API	
URL	https://{baseUrl}/api/{version}/accounts/resources/{accountId}	
Request	Method: PUT, Content type: application/json	
	path	{accountId}
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "effectiveDate": "2021-03-25T02:17:08.572Z", "expirationDate": "2021-03-25T02:17:08.572Z", "isDefault": true, "resourceId": 0, "resourceType": "APN" }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "accountMasterId": 0,

API Interface	Update Account Resource API	
		<pre>"effectiveDate": "2021-03-25T02:22:45.329Z", "expirationDate": "2021-03-25T02:22:45.329Z", "id": 0, "isDefault": true, "resourceId": 0, "resourceType": "APN" }</pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the <i>/resources/{accountId}</i>.</p> <p>Refer to the Parameters table given in the Create Account Resource API section.</p>		
<p>Example:</p> <pre>curl -location -request POST 'https://{baseUrl}/api/{version}/accounts/resources/{accountId}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '<Your data in json format>'</pre>		

4.30 Fetch Account Resource by ID

Description:

This API can be used to fetch resources based on a resource ID.

API Interface	Fetch Account Resource by ID	
URL	https://{baseUrl}/api/{version}/accounts/resources/{id}	
Request	Method: GET	
	path	id=<Resource id>

API Interface		Fetch Account Resource by ID
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "accountMasterId": 0, "effectiveDate": "2021-03-25T02:42:36.279Z", "expirationDate": "2021-03-25T02:42:36.279Z", "id": 0, "isDefault": true, "resourceId": 0, "resourceType": "APN" }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a GET request to the <i>/resources/{id}</i> .		
Example: curl -location -request GET ' https://{baseUrl}/api/{version}/accounts/resources/{id} ' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Account-Context-Id: <ACCOUNT_ID>'		

4.31 Delete Account Resource by ID

Description:

This API can be used to delete resources based on a resource ID.

API Interface	Delete Account Resource by ID
URL	https://{baseUrl}/api/{version}/accounts/resources/{id}

API Interface	Delete Account Resource by ID	
Request	Method: DELETE	
	path	id= <Resource id>
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a DELETE request to the <i>/resources/{id}</i> .		
Example: curl -location -request DELETE 'https://{baseURL}/api/{version}/accounts/resources/{id}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Account-Context-Id: <ACCOUNT_ID>'		

4.32 Add MSISDN Pool to Account

API Interface	Add MSISDN Pool to Account	
URL	https://{baseURL}/api/{version}/accounts/assign_msisdnpool	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": 4406, "resourceType": "MSISDN-POOL", "effectiveDate": "2022-06-23T07:45:57.138Z",

API Interface	Add MSISDN Pool to Account	
		<pre>"expirationDate": "9999-12-31T23:59:59.999Z", "msisdnPools": [4023754] }</pre>
Response	Content Type	application/json
HTTP Status	200 - OK	45c46ea9-4e76-4d14-9708-cd088eca1b24
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

New APIs – FEB 13

4.33 Create Group

Description:

This API can be used to create a group under a subscription.

API Interface	Create Group	
URL	https://{apiGateway}/api/{version}/accounts/groups	
Request	Method: POST, Content type: application/json	
	Header	'Account-Context-Id: <ACCOUNT_ID>' Account-Context-Id
	Request Parameter	{ "name": "grptest12509", "description": "desc12" }
Response	Content Type	application/json

API Interface	Create Group	
HTTP Status	200 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		

4.34 Update Group

Description:

This API can be used to update group under a subscription.

API Interface	Update Group	
URL	https://{apiGateway}/api/{version}/accounts/groups	
Request	Method: PUT, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Request Parameter	{ "id": 5651, "name": "grptest12509", "description": "desc12" }
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.

API Interface	Update Group	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.35 Delete Group

Description:

This API can be used to delete group under a subscription.

API Interface	Delete Group	
URL	https://{apiGateway}/api/{version}/accounts/groups/{id}/resource/{accountId}	
Request	Method: DELETE, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 – OK	Deleted Group.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

4.36 Get Group

Description:

This API can be used to fetch group.

API Interface		Get Group
URL	https://{apiGateway}/api/{version}/graphql	
Request	Method: GET Graph QL	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Request Parameter	<pre> query { accmgmt_tbl_groups (where: {account_master_id: {eq: "6501"}, tenant_id: {_eq: "21"}}) { name account_master_id id } } </pre>
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 5

Subscription API

NOKIA

5 Subscription API

The following section specifies the API for Subscription handling. The root URL resource for all account management functions is:

<https://{baseUrl}/api/{version}/subscription/>

{baseUrl} example: wdh-sitstg2.nokiawing.com

{version} example: v1

5.1 Fetch SIM API

5.1.1 Fetch SIM by Batch

Description:

The endpoint gives the SIM for a given batch where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

{version} example: v1

API Interface	Get SIM by Batch	
URL	https://{baseUrl}/api/{version}/subscription/sims	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Get SIM by Batch	
HTTP Status	200 - OK	<pre>[{ "id": 1169, "tenantId": "21", "eid": null, "accountId": 3122, "accountName": "SubAcct_Retire_Test03", "iccid": "8955644500001089020", "imsi": "234500001089020", "msisdn": "882362000349020", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 1158, "serviceProfileId": 0, "networkProfileId": 1088718, "roamingProfileId": 1087253, "securityProfileId": 0, "ratePlanId": 1011, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0",</pre>

API Interface	Get SIM by Batch	
		<pre> "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "statelId": 7, "stateName": "CONDITIONAL-SUSPEND", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-01T12:41:42.540582Z", "lastStateChangeDate": "2022-01-07T10:57:04.550608Z", "deactivationDate": null }, { "id": 4211, "tenantId": "21", "eid": null, "accountId": 3167, "accountName": "Acc_Retire_Sub", "iccid": "8955644500001089438", "imsi": "234500001089438", "msisdn": "882362000349438", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", </pre>

API Interface	Get SIM by Batch	
		<pre> "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 1207, "serviceProfileId": 0, "networkProfileId": 1096001, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 1077, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "stateId": 8, "stateName": "DEACTIVATED", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-10T11:12:18.705004Z", "lastStateChangeDate": "2021-12-15T12:09:07.228957Z", "deactivationDate": "2021-12-15T12:09:07.228957Z" } </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Get SIM by Batch	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the <i>/sims</i> .		
Example:		
<pre>curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		
"stateName" is ACTIVATED/DEACTIVATED/SUSPENDED/RETIRED/CONDITIONAL-SUSPEND		

The following table explains the parameters used in the API:

Parameter	Type	Description
tenantId	Number	ID of tenant
accountName	String	Account Name
apnGroupId	Number	ID of APN Group
serviceProfileId	Number	ID of Service Profile
networkProfileId	Number	ID of Network Profile
roamingProfileId	Number	ID of Roaming Profile
securityProfileId	Number	ID of Security Profile
ratePlanId	Number	ID of Rate Plan
billingProfileId	Number	ID of Billing Profile
stateName	String	One of the values {ACTIVATED, DEACTIVATED,SUSPENDED,RETIRED,TRAIL, CONDITIONAL-SUSPEND }

5.1.2 Fetch SIM by ID

Description:

The endpoint gives the SIM for a given ID where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

API Interface	Get SIM by ID	
URL	https://{baseUrl}/api/{version}/subscription/sims/1169	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 1169, "tenantId": "21", "eid": null, "accountId": 3122, "accountName": "SubAcct_Retire_Test03", "iccid": "8955644500001089020", "imsi": "234500001089020", "msisdn": "882362000349020", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0",

API Interface	Get SIM by ID	
		<pre> "apnGroupId": 1158, "serviceProfileId": 0, "networkProfileId": 1088718, "roamingProfileId": 1087253, "securityProfileId": 0, "ratePlanId": 1011, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "stateId": 7, "stateName": "CONDITIONAL-SUSPEND", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-01T12:41:42.540582Z", "lastStateChangeDate": "2022-01-07T10:57:04.550608Z", "deactivationDate": null } </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Get SIM by ID	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the <i>/sims</i> .		
Example:		
<pre>curl -location -request GET 'https://{baseURL}/api/{version}/subscription/sims/1169' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		
"stateName" is ACTIVATED/DEACTIVATED/SUSPENDED/RETIRED/TRAIL/CONDITIONAL-SUSPEND		

5.1.3 Fetch SIM by IMSI

Description:

The endpoint gives the SIM for a given IMSI where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

API Interface	Get SIM by IMSI	
URL	https://{baseURL}/api/{version}/subscription/sims/imsi/234500001089020	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Get SIM by IMSI	
HTTP Status	200 - OK	<pre>{ "id": 1169, "tenantId": "21", "eid": null, "accountId": 3122, "accountName": "SubAcct_Retire_Test03", "iccid": "8955644500001089020", "imsi": "234500001089020", "msisdn": "882362000349020", "imslmpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 1158, "serviceProfileId": 0, "networkProfileId": 1088718, "roamingProfileId": 1087253, "securityProfileId": 0, "ratePlanId": 1011, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", }</pre>

API Interface	Get SIM by IMSI	
		<pre> "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "stateId": 7, "stateName": "CONDITIONAL-SUSPEND", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-01T12:41:42.540582Z", "lastStateChangeDate": "2022-01-07T10:57:04.550608Z", "deactivationDate": null } </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseURL}/api/{version}/subscription/sims/imsi/234500001089020' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"stateName" is ACTIVATED/DEACTIVATED/SUSPENDED/RETIRED/TRIAL/CONDITIONAL-SUSPEND</p>		

5.1.4 Fetch SIM by ICCID

Description:

The endpoint gives the SIM for a given ICCID where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

API Interface	Get SIM by ICCID	
URL	https://{baseUrl}/api/{version}/subscription/sims/iccid/8955644500001089020	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 1169, "tenantId": "21", "eid": null, "accountId": 3122, "accountName": "SubAcct_Retire_Test03", "iccid": "8955644500001089020", "imsi": "234500001089020", "msisdn": "882362000349020", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0",

API Interface	Get SIM by ICCID	
		<pre> "apnGroupId": 1158, "serviceProfileId": 0, "networkProfileId": 1088718, "roamingProfileId": 1087253, "securityProfileId": 0, "ratePlanId": 1011, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "stateId": 7, "stateName": "CONDITIONAL-SUSPEND", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-01T12:41:42.540582Z", "lastStateChangeDate": "2022-01-07T10:57:04.550608Z", "deactivationDate": null } </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Get SIM by ICCID	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the <i>/sims</i> .		
Example:		
<pre>curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims/iccid/8955644500001089020' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		
"stateName" is ACTIVATED/DEACTIVATED/SUSPENDED/RETIRED/TRAIL/CONDITIONAL-SUSPEND		

5.1.5 Fetch SIM by MSISDN

Description:

The endpoint gives the SIM for a given MSISDN where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

API Interface	Get SIM by MSISDN	
URL	https://{baseUrl}/api/{version}/subscription/sims/msisdn/882362000349020	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Get SIM by MSISDN	
HTTP Status	200 - OK	<pre>{ "id": 1169, "tenantId": "21", "eid": null, "accountId": 3122, "accountName": "SubAcct_Retire_Test03", "iccid": "8955644500001089020", "imsi": "234500001089020", "msisdn": "882362000349020", "imslmpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 1158, "serviceProfileId": 0, "networkProfileId": 1088718, "roamingProfileId": 1087253, "securityProfileId": 0, "ratePlanId": 1011, "billingProfileId": null, "customField": [], "simFreeId1": "0", "simFreeId2": "0", "simFreeId3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", }</pre>

API Interface	Get SIM by MSISDN	
		<pre> "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": null, "modificationTimestamp": null, "stateId": 7, "stateName": "CONDITIONAL-SUSPEND", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2021-12-01T12:41:42.540582Z", "lastStateChangeDate": "2022-01-07T10:57:04.550608Z", "deactivationDate": null } </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseURL}/api/{version}/subscription/sims/msisdn/882362000349020' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"stateName" is ACTIVATED/DEACTIVATED/SUSPENDED/RETIRED/TRIAL/CONDITIONAL-SUSPEND</p>		

5.2 Fetch SIM using Filter

5.2.1 Fetch SIM by Status

Description:

The endpoint gives the SIM having the Status searched in the filter where "stateName" is important parameter to determine SIM lifecycle state along with tenantId, accountName, apnGroupId, serviceProfileId, networkProfileId, roamingProfileId, securityProfileId, ratePlanId, and billingProfileId.

API Interface	Get SIM by Batch	
URL	https://{baseUrl}/api/{version}/subscription/sims?stateName.equals={SIM Status}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre>{ "id": 482757, "tenantId": "21", "eid": null, "accountId": 5303, "accountName": "July29Acc", "iccid": "8955644099880057172", "imsi": "234500001085172", "msisdn": "882362000500172", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2462, "serviceProfileId": 0, "networkProfileId": 6827361, "roamingProfileId": 1091802,</pre>

API Interface	Get SIM by Batch	
		<pre> "securityProfileId": 0, "ratePlanId": 103752, "ratePlanType": null, "billingProfileId": null, "customField": [{ "id": 503503, "value": "Nokia" }, { "id": 509551, "value": "Nokia" }, { "id": 520702, "value": "Nokia" }, { "id": 520704, "value": "Nokia" }, { "id": 520715, "value": "2022-08-16" }, { "id": 604655, "value": "" }, { "id": 604656, "value": "" }, { "id": 612503, "value": "" }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-07-29 05:11:44+0000", "modificationTimestamp": "2022-09-24 10:35:19+0000", "stateld": 4, </pre>

API Interface	Get SIM by Batch	
		<pre> "stateName": "SUSPENDED", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-08-08 15:17:33+0000", "lastStateChangeDate": "2022-09-24 10:35:19+0000", "deactivationDate": null, "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": false, "unlockData": null, "unlockSms": null, "prevRatePlanId": 102460, "prevServiceProfileId": 1086613, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims?stateName.equals=SUSPENDED' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"stateName" is ACTIVE/DEACTIVATED/TRIAL/ENTERPRISE-INVENTORY/SUSPENDED/RETIRED/CONDITIONAL-SUSPEND</p>		

5.2.2 Fetch SIM by IMSI

Description:

The endpoint gives the details of the SIM when searched by the given IMSI. IMSI refers to the unique number that identifies the SIM.

API Interface		Get SIM by IMSI
URL	https://{baseUrl}/api/{version}/subscription/sims?imsi.equals={IMSI_ID}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre> { "id": 482757, "tenantId": "21", "eid": null, "accountId": 5303, "accountName": "July29Acc", "iccid": "8955644099880057172", "imsi": "234500001085172", "msisdn": "882362000500172", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2462, "serviceProfileId": 0, "networkProfileId": 6827361, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 103752, "ratePlanType": null, "billingProfileId": null, "customField": [</pre>

API Interface	Get SIM by IMSI	
		<pre> { "id": 503503, "value": "Nokia" }, { "id": 509551, "value": "Nokia" }, { "id": 520702, "value": "Nokia" }, { "id": 520704, "value": "Nokia" }, { "id": 520715, "value": "2022-08-16" }, { "id": 604655, "value": "" }, { "id": 604656, "value": "" }, { "id": 612503, "value": "" }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-07-29 05:11:44+0000", "modificationTimestamp": "2022-09-24 10:35:19+0000", "stateId": 4, "stateName": "SUSPENDED", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, </pre>

API Interface	Get SIM by IMSI	
		<pre> "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-08-08 15:17:33+0000", "lastStateChangeDate": "2022-09-24 10:35:19+0000", "deactivationDate": null, "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": false, "unlockData": null, "unlockSms": null, "prevRatePlanId": 102460, "prevServiceProfileId": 1086613, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims?imsi.equals={IMSI}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"imsi" is the IMSI of the SIM to be searched.</p>		

5.2.3 Fetch SIM by ICCID

Description:

The endpoint gives the details of the SIM when searched by the given ICCID. ICCID is the unique serial number of the SIM card.

API Interface		Get SIM by ICCID
URL	https://{baseUrl}/api/{version}/subscription/sims?iccid.equals={ICCID}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre>{ "id": 482757, "tenantId": "21", "eid": null, "accountId": 5303, "accountName": "July29Acc", "iccid": "8955644099880057172", "imsi": "234500001085172", "msisdn": "882362000500172", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2462, "serviceProfileId": 0, "networkProfileId": 6827361, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 103752, "ratePlanType": null, "billingProfileId": null, "customField": [</pre>

API Interface	Get SIM by ICCID	
		<pre> { "id": 503503, "value": "Nokia" }, { "id": 509551, "value": "Nokia" }, { "id": 520702, "value": "Nokia" }, { "id": 520704, "value": "Nokia" }, { "id": 520715, "value": "2022-08-16" }, { "id": 604655, "value": "" }, { "id": 604656, "value": "" }, { "id": 612503, "value": "" }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-07-29 05:11:44+0000", "modificationTimestamp": "2022-09-24 10:35:19+0000", "stateId": 4, "stateName": "SUSPENDED", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, </pre>

API Interface	Get SIM by ICCID	
		<pre> "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-08-08 15:17:33+0000", "lastStateChangeDate": "2022-09-24 10:35:19+0000", "deactivationDate": null, "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": false, "unlockData": null, "unlockSms": null, "prevRatePlanId": 102460, "prevServiceProfileId": 1086613, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseURL}/api/{version}/subscription/sims?iccid.equals={ICCID}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"iccid" is the ICCID of the SIM to be searched.</p>		

5.2.4 Fetch SIM by MSISDN

Description:

The endpoint gives the details of the SIM when searched by the given MSISDN.

API Interface		Get SIM by MSISDN
URL	https://{baseUrl}/api/{version}/subscription/sims?msisdn.equals={MSISDN}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre> { "id": 482757, "tenantId": "21", "eid": null, "accountId": 5303, "accountName": "July29Acc", "iccid": "8955644099880057172", "imsi": "234500001085172", "msisdn": "882362000500172", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2462, "serviceProfileId": 0, "networkProfileId": 6827361, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 103752, "ratePlanType": null, "billingProfileId": null, "customField": [{ "id": 503503, </pre>

API Interface	Get SIM by MSISDN	
		<pre> "value": "Nokia" }, { "id": 509551, "value": "Nokia" }, { "id": 520702, "value": "Nokia" }, { "id": 520704, "value": "Nokia" }, { "id": 520715, "value": "2022-08-16" }, { "id": 604655, "value": "" }, { "id": 604656, "value": "" }, { "id": 612503, "value": "" } }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-07-29 05:11:44+0000", "modificationTimestamp": "2022-09-24 10:35:19+0000", "stateId": 4, "stateName": "SUSPENDED", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, </pre>

API Interface	Get SIM by MSISDN	
		<pre> "initialActivationDate": "2022-08-08 15:17:33+0000", "lastStateChangeDate": "2022-09-24 10:35:19+0000", "deactivationDate": null, "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": false, "unblockData": null, "unblockSms": null, "prevRatePlanId": 102460, "prevServiceProfileId": 1086613, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims?msisdn.equals={MSISDN}' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre> <p>"msisdn" is the MSISDN of the SIM to be searched.</p>		

5.2.5 Fetch SIMs by Page

Description:

This API is used to retrieve the information of all the SIMs in a page. A single page contains up to 2000 SIMs. The page number needs to be adjusted to read the next batch of 2000 SIMs. Steps can be repeated to read all SIMs.

API Interface		Get SIMs by Page (up to 2000 SIMs)
URL	https://{baseUrl}/api/{version}/subscription/sims?page=1&size=2000 https://{baseUrl}/api/{version}/subscription/sims?page=2&size=2000	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	<pre>[{ "id": 615055, "tenantId": "21", "eid": null, "accountId": 3439, "accountName": "DNT_MoveSIM", "iccid": "8955644099890137106", "imsi": "234500001317106", "msisdn": "882362001037106", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2193, "serviceProfileId": 0, "networkProfileId": 1087055, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 65362, "ratePlanType": null,</pre>

API Interface	Get SIMs by Page (up to 2000 SIMs)	
		<pre> "billingProfileId": null, "customField": [{ "id": 2134451, "value": "" }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-08-31 07:18:25+0000", "modificationTimestamp": "2022-11-01 17:46:35+0000", "stateId": 3, "stateName": "ACTIVE", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-11-01 17:46:35+0000", "lastStateChangeDate": "2022-11-01 17:46:35+0000", "deactivationDate": "2022-10-12 08:21:46+0000", "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": null, "unblockData": null, "unblockSms": null, "prevRatePlanId": null, "prevServiceProfileId": null, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Get SIMs by Page (up to 2000 SIMs)	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a GET request to the <i>/sims</i>		
The response contains the information of all the SIMs in a page. A single page has up to 2000 SIMs.		
Example:		
<pre>curl -location -request POST 'https://{baseUrl}/api/{version}/subscription/sims?page=1&size=2000' -- header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Description
id	Number	ID of SIM
tenantId	String	ID of tenant
eid	String	EID
accountId	Number	ID of account
accountName	String	Name of the account
iccid	String	ICCID
imsi	String	IMSI
msisdn	String	MSISDN
imsImpi	String	IMSIMPI
pin1	Number	PIN 1
pin2	Number	PIN 2
puk1	String	PUK 1
puk2	String	PUK 2
version	String	Version
euimid	String	ID of EUIM
tag	String	Tag

Parameter	Type	Description
batchId	String	ID of batch
formFactor	String	Form factor
simSku	String	SIM SKU
vendor	String	Vendor
identityVendor	String	Identity of Vendor
graphicProfile	String	Graphic profile
inputProfile	String	Input profile
serviceProfileId	Number	ID of Service Profile
networkProfileId	Number	ID of Network Profile
apnGroupId	Number	ID of APN Group
roamingProfileId	Number	ID of Roaming Profile
securityProfileId	Number	ID of Security Profile
ratePlanId	Number	ID of Rate Plan
billingProfileId	Number	ID of Billing Profile
simFreeId1	String	SIM Free ID 1
simFreeId2	String	SIM Free ID 2
simFreeId3	String	SIM Free ID 3
equipmentId	String	ID of equipment
firmwareVersion	String	Firmware version
custom1	String	Custom 1
custom2	String	Custom 2
custom3	String	Custom 3
custom4	String	Custom 4
custom5	String	Custom 5
creationTimestamp	Date/Time	Date and Time of creation
modificationTimestamp	Date/Time	Date and Time of modification
resetState	Binary	Reset State

Parameter	Type	Description
resetApnGroup	Binary	Reset APN Group
resetRateplan	Binary	Reset Rate Plan
resetServiceProfile	Binary	Reset Service Profile
unblockData	Binary	Unblock data
unblockSms	Binary	Unblock SMS
prevRatePlanId	Number	ID of previous Rate Plan
prevServiceProfileId	Number	ID of previous Service Profile
prevApnGroupId	Number	ID of previous APN Group
stateId	Number	ID of State
stateName	String	One of the values {ACTIVATED, DEACTIVATED,SUSPENDED,RETIRED,TRAIL, CONDITIONAL-SUSPEND}
stateModelId	Number	ID of state model
stateChangeLock	Binary	State change lock
lcStateInsync	Binary	IC State in Sync
stateChangeReason	String	Reason for state change

5.3 SIM Filters

Description:

The SIM filter APIs can help you get the details of all the SIMs that satisfy the specified filter criteria on a certain parameter.

The following table explains the filter parameters, operators, and the criteria used in the SIM filter APIs:

S.No.	Filter Parameter	Operator	Data Type	Criteria
1	id	equals notEquals in notIn greaterThan	Number	TRUE

S.No.	Filter Parameter	Operator	Data Type	Criteria
		lessThan greaterThanOrEqualTo lessThanOrEqualTo		
2	tenantId	equals notEquals in notIn contains doesNotContain	String	TRUE
3	eid	equals notEquals in notIn contains doesNotContain	String	TRUE
4	accountId	equals notEquals in notIn greaterThan lessThan greaterThanOrEqualTo lessThanOrEqualTo	Number	TRUE
5	accountName	equals notEquals in notIn contains doesNotContain	String	TRUE
6	iccid	equals notEquals in notIn	String	TRUE

S.No.	Filter Parameter	Operator	Data Type	Criteria
		contains doesNotContain		
7	imsi	equals notEquals in notIn contains doesNotContain	String	TRUE
8	msisdn	equals notEquals in notIn contains doesNotContain	String	TRUE
9	imsImpi	equals notEquals in notIn contains doesNotContain	String	TRUE
10	pin1	equals notEquals in notIn greaterThan lessThan greaterThanOrEqual lessThanOrEqual	Number	TRUE
11	pin2	equals notEquals in notIn	Number	TRUE

S.No.	Filter Parameter	Operator	Data Type	Criteria
		greaterThan lessThan greaterThanOrEqualTo lessThanOrEqualTo		
12	puk1	equals notEquals in notIn contains doesNotContain	String	TRUE
13	puk2	equals notEquals in notIn contains doesNotContain	String	TRUE
14	version	equals notEquals in notIn contains doesNotContain	String	TRUE
15	euimid	equals notEquals in notIn contains doesNotContain	String	TRUE
16	tag	equals notEquals in notIn contains	String	TRUE

57	stateChangeReason	equals notEquals in notIn	String	TRUE

S.No.	Filter Parameter	Operator	Data Type	Criteria
		contains doesNotContain		

5.3.1 Single API Filter

Description:

The endpoint gives the details of all the SIMs that satisfy the single filter (one parameter) condition. For example, the following API will give the details of all the SIMs for which the Account ID (a parameter) is equal to, greater than, or less than the specified Account ID.

API Interface	Single API Filter	
URL	https://{baseUrl}/api/{version}/subscription/sims?accountId.equals={accountId} https://{baseUrl}/api/{version}/subscription/sims?accountId.greaterThan={accountId} https://{baseUrl}/api/{version}/subscription/sims?accountId.lessThan={accountId}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre>{ "id": 615055, "tenantId": "21", "eid": null, "accountId": 3439, "accountName": "DNT_MoveSIM", "iccid": "8955644099890137106", "imsi": "234500001317106", "msisdn": "882362001037106", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0",</pre>

API Interface	Single API Filter	
		<pre> "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupld": 2193, "serviceProfileld": 0, "networkProfileld": 1087055, "roamingProfileld": 1091802, "securityProfileld": 0, "ratePlanld": 65362, "ratePlanType": null, "billingProfileld": null, "customField": [{ "id": 2134451, "value": "" }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentld": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-08-31 07:18:25+0000", "modificationTimestamp": "2022-11-01 17:46:35+0000", "stateld": 3, "stateName": "ACTIVE", "stateModelld": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-11-01 17:46:35+0000", "lastStateChangeDate": "2022-11-01 17:46:35+0000", "deactivationDate": "2022-10-12 08:21:46+0000", "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": null, "unlockData": null, "unlockSms": null, "prevRatePlanld": null, "prevServiceProfileld": null, "prevApnGroupld": null, "stateChangeReason": "USER_ACTION", "reason": null, </pre>

API Interface	Single API Filter	
		<pre> "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <i>/sims</i>.</p>		
<p>Example:</p> <pre> curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims?accountId.equals={accountId}' - -header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' </pre>		

5.3.2 Multiple API Filters

Description:

The endpoint gives the details of all the SIMs that satisfy the multiple filter (more than one parameters) conditions. You can use "&" to add more filter criteria.

For example, the following API will give the details of all the SIMs for which the Account ID (a parameter) is less than the specified Account ID and ICCID is equal to the specified value.

API Interface	Multiple API Filters	
URL	https://{baseUrl}/api/{version}/subscription/sims?accountId.lessThan={account ID}&iccid.equals={ICCID}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	[<pre> { "id": 615055, "tenantId": "21", "eid": null, "accountId": 3439, "accountName": "DNT_MoveSIM", "iccid": "8955644099890137106", "imsi": "234500001317106", "msisdn": "882362001037106", "imsImpi": null, "pin1": 0, "pin2": 0, "puk1": "0", "puk2": "0", "version": "0", "tag": "0", "euimid": null, "batchId": 0, "formFactor": "0", "simSku": "0", "vendor": "0", "identityVendor": "0", "graphicProfile": "0", "inputProfile": "0", "apnGroupId": 2193, "serviceProfileId": 0, "networkProfileId": 1087055, "roamingProfileId": 1091802, "securityProfileId": 0, "ratePlanId": 65362, "ratePlanType": null, "billingProfileId": null, "customField": [{ "id": 2134451, "value": "" }] } </pre>

API Interface	Multiple API Filters	
		<pre> }], "simFreeld1": "0", "simFreeld2": "0", "simFreeld3": "0", "equipmentId": "0", "firmwareVersion": "0", "custom1": "0", "custom2": "0", "custom3": "0", "custom4": "0", "custom5": "0", "creationTimestamp": "2022-08-31 07:18:25+0000", "modificationTimestamp": "2022-11-01 17:46:35+0000", "stateId": 3, "stateName": "ACTIVE", "stateModelId": 4, "stateChangeLock": false, "lcStateInsync": true, "tenantMetaData": null, "ipAddresses": [], "networkInterface": null, "initialActivationDate": "2022-11-01 17:46:35+0000", "lastStateChangeDate": "2022-11-01 17:46:35+0000", "deactivationDate": "2022-10-12 08:21:46+0000", "resetState": false, "resetApnGroup": null, "resetRateplan": null, "resetServiceProfile": null, "unblockData": null, "unblockSms": null, "prevRatePlanId": null, "prevServiceProfileId": null, "prevApnGroupId": null, "stateChangeReason": "USER_ACTION", "reason": null, "resetRequired": null }] </pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

API Interface	Multiple API Filters
Notes:	
Send a GET request to the <i>/sims</i> .	
Example:	
<pre>curl -location -request GET 'https://{baseUrl}/api/{version}/subscription/sims?accountId.lessThan={accountID}&iccid.equals={ICCID}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>	

5.4 Fetch SIM Usage

5.4.1 Graphql for Data Usage

Description:

This API retrieves and displays data usage details for a given SIM in the current Billing Cycle.

API Interface	Data Usage for a SIM	
URL	https://{baseUrl}/api/{version}/graphql	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "query": "query DataUsageOnline { restgw_tbl_subscriber_data_balance_aggregate(order_by: {id: desc},where: { _and:[{subscription_id_data0:{_eq:\"{IMSI}\"}}, {accumulator_type:{_eq:\"Billing-Cycle\"}}, {active:{_eq:\"true\"}},]}){ aggregate { sum accumulated_usage } } }", "variables": null, "operationName": "DataUsageOnline" }
Response	Content Type	Text

API Interface	Data Usage for a SIM	
HTTP Status	200 - OK	{ "data": { "restgw_tbl_subscriber_data_balance_aggregate": { "aggregate": { "sum": { "accumulated_usage": 2144643861 } } } } }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a POST request to the <i>/graphql</i>		
The response contains the total data usage for the SIM.		
Example:		
<pre>curl -location -request POST 'https://{baseUrl}/api/{version}/graphql' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>		

5.4.2 Graphql for SMS and Voice

Description:

This API retrieves and displays SMS and Voice usage details for a given SIM in the current Billing Cycle.

API Interface	SMS and Voice Details for a SIM
URL	https://{baseUrl}/api/{version}/graphql
Request	Method: POST, Content type: application/json

API Interface		SMS and Voice Details for a SIM
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "query": "query DataUsageOffline {\n rating_usage_accumulator(order_by: {id: desc}, limit: 1,where:\n {_and:[\n {tenant_id:{_eq:\"{TenantID}\"}},\n {subscription_id:{_eq:\"{SubscriptionID}\"}},\n {counter_type:{_eq:\"Monthly\"}},\n },\n)}{\n counter_sms_mo\n counter_sms_mt\n counter_voice_mo\n counter_voice_mt\n counter_data\n }", "variables": null, "operationName": "DataUsageOffline" }
Response	Content Type	Text
HTTP Status	200 - OK	{ "data": { "rating_usage_accumulator": [{ "counter_sms_mo": null, "counter_sms_mt": null, "counter_voice_mo": null, "counter_voice_mt": null, "counter_data": null}] } }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes: Send a POST request to the <i>/graphql</i> The response contains the SMS and Voice usage details for the SIM.		

API Interface	SMS and Voice Details for a SIM
<p>Example:</p> <pre>curl -location -request POST 'https://{baseUrl}/api/{version}/graphql' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>	

5.4.3 Graphql for SIMs with Data Usage

Description:

This API retrieves and displays the list of SIMs in an account with their data usage details in the current Billing Cycle. The request body should be modified to get response with relevant fields as required by the user.

API Interface	SIMs with Data Usage	
URL	https://{baseUrl}/api/{version}/graphql	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	<pre>query GetList_simlcmmanagement_vw_subscription { simlcmmanagement_vw_subscription(limit: 5, offset: 0,where:{_and:[, {tenant_id:{_eq:"1"}}, {account_id:{_eq:"241"}},]}),{ account_id account_name account_account_state account_id account_name apn_group_id apn_group_name custom_fields iccid id imsi msisdn network_profile_id network_profile_name rate_plan_id rate_plan_name rate_plan_subscription_type</pre>

API Interface	SIMs with Data Usage	
		rate_plan_type roaming_profile_id roaming_profile_rp_name state_id state_name tags ip_address last_used_imei, data_usage_online_radius_accumulated_usage, } }
Response	Content Type	Text
HTTP Status	200 - OK	<pre> { "data": { "simlcmangement_vw_subscription": [{ "account_id": 241, "account_name": "OGILINK SRL", "account_account_state": "ACTIVE", "apn_group_id": 402, "apn_group_name": "OGILINK SRL apn iot5g.windtre", "custom_fields": [{ "id": 13201, "value": "" }, { "id": 13251, "value": "" }, { "id": 13202, "value": "" }, { "id": 13502, "value": "" }, { "id": 13501, "value": "" }, { "id": 13204, "value": "" }, { "id": 13203, "value": "" }] }] } } </pre>

API Interface	SIMs with Data Usage

	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

API Interface	SIMs with Data Usage
<p>Notes:</p> <p>Send a POST request to the <i>/graphql</i></p> <p>The response contains the list of SIMs in the account with their total data usage in the current billing cycle.</p>	
<p>Example:</p> <pre>curl -location -request POST 'https://{baseUrl}/api/{version}/graphql' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre> <p>Here, <ACCOUNT_ID> is the ID of the account, <LIMIT> is the number of SIMs, and <OFFSET> is according to limit. For example, if the Limit is 5 and Offset is 0, then the first five SIMs will be returned. And if the Limit is 5 and offset is 5, then the next five SIMs will be returned.</p>	

5.5 Fetch Session Details

Description:

This API is used to retrieve the information related to the current or most recent session for a given SIM.

API Interface		Session Details for a SIM
URL	https://{baseUrl}/api/{version}/graphql	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "query": "query GetSubscriptionsById { simlcmangement_subscription_identity(where: { _and: [{id: {_eq: \"{ID}\"}}, {account_id: {_eq: \"{AccountID}\"}}, {tenant_id: {_eq: \"{TenantID}\"}},]}) { id ,account_id ,account_name,iccid,imsi,msisdn,rate_plan_id,state_change_reason, apn_group_id,network_profile_id,roaming_profile_id, state_id,state_model_id,eid, custom_fields, state_change_lock,lc_state_insync network_profile { name }, apn_group { apn_group_name }, roaming_profile { rp_name }, rate_plan { name plan_type subscription_type }, state { name }, subscription_tag_associations { id, tag { name id }, account { account_state }, session_states(limit: 1,order_by: {id: desc}) { id session_id session_start_time session_end_time user_location_info sgsn_address sgsn_mcc_mnc pdp_address rat_type access_point_name input_usage_accumulation output_usage_accumulation } cdr_data(order_by: {record_opening_time: desc}, limit: 1) { last_modified_date rat_type record_opening_time served_imeisv served_pdp_pdn_address serving_node_plmn_identifier }, data_usage_online { accumulated_usage }, data_usage_online_radius { accumulated_usage }, sms_usage_online { mo_usage mt_usage }, subscription_state_change_log(where: {action: {_eq: \"activate\"}, status: {_eq: \"COMPLETED\"}}, order_by: {modification_timestamp: desc}, limit: 1) { modification_timestamp }, voice_usage { counter_data counter_sms_mo counter_sms_mt counter_voice_mo counter_voice_mt } } }", "variables": null, "operationName": "GetSubscriptionsById" }

API Interface		Session Details for a SIM	
Response	Content Type	Text

401 - Unauthorized		No valid JWT token provided.
403 - Forbidden		User does not have permissions to perform the request.
429 - Too Many Requests		Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
404 - Not Found		The requested resource does not exist.
500, 502, 503, 504 - Server Errors		Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

API Interface	Session Details for a SIM
Notes:	
Send a POST request to the <i>/graphql</i>	
The response contains the session details for the SIM.	
Example:	
<pre>curl -location -request POST 'https://{baseUrl}/api/{version}/graphql' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>	

5.6 Allowed SIM State Transitions

Description:

This API is used to fetch the allowed state transitions.

API Interface	Allowed SIM State Transitions	
URL	https://{baseUrl}/api/{version}/subscription/model/{modelId}/allowed-state-transition	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Allowed SIM State Transitions	
HTTP Status	200 - OK	<pre> [["id": 19, "tenantId": "21", "accountId": null, "allowed": true, "creationTimestamp": "2021-03-11T14:41:00Z", "modificationTimestamp": "2021-03-11T14:41:00Z", "fromStateId": 8, "fromStateName": "DEACTIVATED", "toStateId": 3, "toStateName": "ACTIVE", "subscriptionLcStateModelId": 4 }, { "id": 14, "tenantId": "21", "accountId": null, "allowed": true, "creationTimestamp": "2021-03-11T14:41:00Z", "modificationTimestamp": "2021-03-11T14:41:00Z", "fromStateId": 3, "fromStateName": "ACTIVE", "toStateId": 7, "toStateName": "CONDITIONAL-SUSPEND", "subscriptionLcStateModelId": 4 }, { "id": 17, "tenantId": "21", "accountId": null, "allowed": true, "creationTimestamp": "2021-03-11T14:41:00Z", "modificationTimestamp": "2021-03-11T14:41:00Z", "fromStateId": 7, "fromStateName": "CONDITIONAL-SUSPEND", "toStateId": 3, "toStateName": "ACTIVE", "subscriptionLcStateModelId": 4 }, { "id": 111, "tenantId": "21", </pre>

	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.7 Update Billing State API

Description:

This API triggers a workflow in the system and returns a unique batch identifier. This UUID can be used in other APIs to check the progress of the workflow.

API Interface	Update Billing State	
URL	https://{baseUrl}/api/{version}/sim/update_state	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "iccid":"8955644099890700001", "imsi":"234500001087001", "newState":"ACTIVE", "newStateId":3 }
Response	Content Type	Text
HTTP Status	202 - Accepted	f80120c0-e444-47de-8dfe-a2e6c6e83f36
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a POST request to the <i>/update-state</i> .		
The response contains a unique batch UUID for the request.		
Use "Workflow Status API" to monitor the status of the workflow.		
Example:		
curl -location -request POST ' https://{baseUrl}/api/{version}/sim/update_state ' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --data-raw '{Your input}'		

The following table explains the parameters used in the API:

Parameter	Type	Requirement	Description																						
iccid	integer	Mandatory	ICCID value																						
imsi	integer	Mandatory	IMSI value																						
newState	String	Mandatory	One of the values - {ACTIVE, CONDITIONAL-SUSPEND, DEACTIVATED, SUSPENDED, RETIRED, TRIAL}																						
newStateId	integer	Mandatory	One of the values - <table border="1"> <thead> <tr> <th>State ID</th> <th>State Name</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>ENTERPRISE-INVENTORY</td> </tr> <tr> <td>4</td> <td>SUSPENDED</td> </tr> <tr> <td>5</td> <td>REGULATORY-HOLD</td> </tr> <tr> <td>6</td> <td>CSP-HOLD</td> </tr> <tr> <td>7</td> <td>CONDITIONAL-SUSPEND</td> </tr> <tr> <td>8</td> <td>DEACTIVATED</td> </tr> <tr> <td>9</td> <td>RETIRED</td> </tr> <tr> <td>10</td> <td>DEALLOCATED</td> </tr> <tr> <td>2</td> <td>TRIAL</td> </tr> <tr> <td>3</td> <td>ACTIVE</td> </tr> </tbody> </table>	State ID	State Name	1	ENTERPRISE-INVENTORY	4	SUSPENDED	5	REGULATORY-HOLD	6	CSP-HOLD	7	CONDITIONAL-SUSPEND	8	DEACTIVATED	9	RETIRED	10	DEALLOCATED	2	TRIAL	3	ACTIVE
State ID	State Name																								
1	ENTERPRISE-INVENTORY																								
4	SUSPENDED																								
5	REGULATORY-HOLD																								
6	CSP-HOLD																								
7	CONDITIONAL-SUSPEND																								
8	DEACTIVATED																								
9	RETIRED																								
10	DEALLOCATED																								
2	TRIAL																								
3	ACTIVE																								

5.8 BatchId Status API

Description:

This API is used to get the current status of the batchId. Different batch tasks can be tracked using this API.

API Interface	Workflow Status API	
URL	https://{baseUrl}/api/{version}/sim/{batchId}	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json

API Interface	Workflow Status API	
HTTP Status	200 - OK	<pre> { "ownerApp": "", "createTime": 1615185923782, "updateTime": 1615185925104, "status": "COMPLETED", "endTime": 1615185925104, "workflowId": "53cdc2a6-cf6c-4ed1-abcc-1901a2c0e625", "tasks": [{ "taskType": "sim_lc_update_state_task", "status": "COMPLETED", "inputData": { "iccid": "integer", "state": "SUSPENDED" }, "referenceTaskName": "sim_lc_update_state_task", "retryCount": 0, "seq": 1, "pollCount": 1, "taskDefName": "sim_lc_update_state_task", "scheduledTime": 1615185923806, "startTime": 1615185923863, "endTime": 1615185923987, "updateTime": 1615185923863, "startDelayInSeconds": 0, "retried": false, "executed": true, "callbackFromWorker": true, "responseTimeoutSeconds": 30, "workflowInstanceId": "53cdc2a6-cf6c-4ed1-abcc-1901a2c0e625", "workflowType": "update_sim_state_wf", "taskId": "448dddb0-198e-4384-a560-ef2b4ac44a06", "callbackAfterSeconds": 0, "workerId": "elektra-app-1", "outputData": { "action": { "action": "bar" } } }] } </pre>

API Interface	Workflow Status API	
		<pre>"message": "Success", "statusCode": 200 }</pre>
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a GET request to the <code>/{batch id}</code>.</p> <p>The response is a JSON object.</p> <p>"status" represents the status of the workflow.</p>		
<p>Example:</p> <pre>curl -location -request GET 'https://{baseURL}/api/{version}/sim/{batch id}' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Account-Context-Id: <ACCOUNT_ID>'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Description
status	String	COMPLETED, PARTIALLY COMPLETED, FAILED
taskType	String	Batch uid task
startTime	integer	Start time for the task
endTime	integer	End time for the task
updateTime	integer	Update time for the task

5.9 Assign APN (APN Group) to SIM

Description:

This API triggers a workflow in the system and returns a unique batch identifier. This UUID can be used in other APIs to check the progress of the workflow.

Prior to running this API, user is advised to run the following APIs to get the data required to accomplish this task of assigning APN (APN Group) to SIM.

- Account Query API (<https://{baseUrl}/api/{version}/accounts/account>) - To get Account ID
- Fetch Account APN Group (<https://{baseUrl}/api/{version}/accounts/address/{id}/apnGroup>)

API Interface		Assign APN (APN Group) to SIM
URL	https://{baseUrl}/api/{version}/sim/assign_apn	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "iccid": "8955644099890089041", "imsi": "234500001179041", "apnGroupId": 1391, "accountId": 3241, "tenantId": "21" }
Response	Content Type	Text
HTTP Status	200 - OK	f80120c0-e444-47de-8dfe-a2e6c6e83f36
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a PUT request to the <i>/assign_apn</i></p> <p>The response contains a unique batch UUID for the request.</p> <p>Use "Workflow Status API" to monitor the status of the workflow.</p>		

API Interface	Assign APN (APN Group) to SIM
Example:	
<pre>curl -location -request PUT 'https://{baseURL}/api/{version}/sim/assign_apn' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Description
iccid	integer	ICCID value
imsi	integer	IMSI value
apnGroupId	integer	APN Group ID
accountId	integer	Account ID
tenantId	string	Tenant ID

5.10 Assign Service Profile (Network Profile) to SIM

Description:

This API triggers a workflow in the system and returns a unique batch identifier. This UUID can be used in other APIs to check the progress of the workflow.

Prior to running this API, user is advised to fetch the account ID and service profile ID using the following APIs in a sequence.

- Account Query API (<https://{baseURL}/api/{version}/accounts/account>)
- Service Profile Resources Query API (<https://{baseURL}/api/{version}/accounts/account/{accountId}/resources?resourceType.equals=SERVICE-PROFILE>) - To get Service Profile ID

API Interface	Assign Service Profile to SIM	
URL	https://{baseURL}/api/{version}/sim/assign_service_profile	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface		Assign Service Profile to SIM
	body	{ "iccid": "integer", "imsi": "integer", "serviceProfileId": "integer" }
Response	Content Type	Text
HTTP Status	202 - OK	f80120c0-e444-47de-8dfe-a2e6c6e83f36
	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <p>Send a POST request to the <i>/assign_service_profile</i></p> <p>The response contains a unique batch UUID for the request.</p> <p>Use "Workflow Status API" to monitor the status of the workflow.</p>		
<p>Example:</p> <pre>curl -location -request POST 'https://{baseURL}/api/{version}/sim/assign_service_profile' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Description
iccid	integer	ICCID value
imsi	integer	IMSI value
serviceProfileId	integer	Service Profile ID

5.11 Change Rate Plan

Description:

Prior to running this API, user is advised to fetch the account ID and rate plan ID using the following APIs in a sequence.

- Account Query API (<https://{baseUrl}/api/{version}/accounts/account>)
- Rate Plan Resources Query API (<https://{baseUrl}/api/{version}/accounts/account/{accountId}/resources>) - To get Rate Plan ID

API Interface		Assign Rate Plan to SIM
URL	https://{baseUrl}/api/{version}/subscription/sims/rateplan	
Request	Method: PUT, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "iccid": "integer", "ratePlanId": "integer", "accountId": "integer" }
	Request Parameter	{"iccid":"8955644099880275001","ratePlanId":200468,"accountId":7189,"row":{"account_account_state":"ACTIVE","account_id":7189,"account_name":"Deepthi 10k SIMs","apn_group_id":3553,"apn_group_name":"Check12","custom_fields":[{"id":359801,"value":""}, {"id":2152711,"value":""}, {"id":2152156,"value":""}, {"id":2379901,"value":""}, {"id":2379152,"value":""}, {"id":2379902,"value":""}, {"id":2421103,"value":""}, {"id":2442451,"value":""}],"iccid":"8955644099880275001","id":2246904,"imsi":"234500000875001","msisdn":"882362000275001","network_profile_id":4020701,"network_profile_name":"ALL SERVICES ENABLED","rate_plan_id":199706,"rate_plan_name":"PMSOLO1101","rate_plan_subscription_type":"Pay Monthly","rate_plan_type":"Individual","roaming_profile_id":1087253,"roaming_profile_rp_name":"ALLPLMN","session_states_id":null,"activation_time":"2023-01-30T06:25:37.022482","state_model_id":4,"state_change_lock":false,"state_change_reason":"USER_ACTION","state_id":3,"state_name":"ACTIVE","tags":"23 june 1,17th june pub,alltag2","tenant_id":"21","ip_address":null,"last_used_imei":null,"data_usage_online":null,"group_id":null,"group_name":null}}
Response	Content Type	Text

API Interface	Assign Rate Plan to SIM	
HTTP Status	200 - OK	JWT token
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Example:</p> <pre>curl -location -request POST 'https://{baseUrl}/api/{version}/subscription/sims/rateplan' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>		

The following table explains the parameters used in the API:

Parameter	Type	Description
lccid	integer	ICCID value
ratePlanId	integer	Rate Plan ID
accountId	integer	Account ID

5.12 Assign Roaming Profile to SIM

Description:

This API triggers a workflow in the system and returns a unique batch identifier. This UUID can be used in other APIs to check the progress of the workflow.

- Account Query API (<https://{baseUrl}/api/{version}/accounts/account>)
- Roaming Profile Resources Query API (<https://{baseUrl}/api/{version}/accounts/account/{accountId}/resources>) - To get Roaming Profile ID

API Interface		Assign Roaming Profile to SIM
URL	https://{baseUrl}/api/{version}/sim/assign_roaming_profile	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "iccid": "integer", "roamingProfileId": "integer" }
Response	Content Type	Text
HTTP Status	202 - OK	f80120c0-e444-47de-8dfe-a2e6c6e83f36
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Send a POST request to the <i>/assign_roaming_profile_sim_wf</i>		
The response contains a unique batch UUID for the request.		
Use "Workflow Status API" to monitor the status of the workflow.		

API Interface	Assign Roaming Profile to SIM
Example:	
<pre>curl -location -request POST 'https://{baseUrl}/api/{version}/sim/assign_roaming_profile' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>	

The following table explains the parameters used in the API:

Parameter	Type	Description
iccid	integer	ICCID value
roamingProfileId	integer	Roaming Profile ID

5.13 Send SMS API

Description:

This API sends SMS to the selected SIM(s).

Prior to running this API, user is advised to establish an SMPP connection towards the SMS Server.

API Interface	Send SMS to SIM	
URL	https://{baseUrl}/api/{version}/notification/sms/sendsms	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "to": "<MSIDN_1, MSIDN_2, MSIDN_3, MSIDN_4>", "message": "<YOUR MESSAGE>" }
Response	Content Type	Text
HTTP Status	202 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Send SMS to SIM	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.14 Move SIMs API

5.14.1 Move SIMs by ICCID Range

API Interface	Move SIMs by ICCID Range	
URL	https://{baseUrl}/api/{version}/resources/batch/sims/assign?reassign=true	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface		Move SIMs by ICCID Range
	body	<pre>{ "accountId": 3418, "accountName": "BulkOperations", "fromAccountId": 3992, "fromAccountName": "Deeps", "tenantId": "21", "apnGroupId": 1386, "apnIds": [1094202], "serviceProfileId": 1088907, "roamingProfileId": 1091802, "rateplanId": 1012, "useImsi": false, "range": { "start": "8955644099890130624", "end": "8955644099890130624" }, "iccidRange": { "start": "8955644099890130624", "end": "8955644099890130624" }, "imsiRange": null }</pre>
Response	Content Type	Text
HTTP Status	202 - Accepted	3a4781d0-b55e-4c05-ac0e-b1ffbfa8bf18
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.14.2 Move SIMs by IMSI Range

API Interface		Move SIMs by IMSI Range
URL	https://{baseUrl}/api/{version}/resources/batch/sims/assign?reassign=true	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ <pre> "accountId": 3418, "accountName": "BulkOperations", "fromAccountId": 3992, "fromAccountName": "Deeps", "tenantId": "21", "apnGroupId": 1386, "apnIds": [1094202], "serviceProfileId": 1088907, "roamingProfileId": 1091802, "rateplanId": 1012, "useImsi": true, "range": { "start": "234500001310625", "end": "234500001310625" }, "iccidRange": null, "imsiRange": { "start": "234500001310625", "end": "234500001310625" } </pre> }
Response	Content Type	Text
HTTP Status	202 - Accepted	5d4c0bc5-161a-4a4f-9e35-bdd0e55ffbe0
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Move SIMs by IMSI Range	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.15 Tags API

5.15.1 Create Tag API

API Interface	Create Tag API	
URL	https://{baseUrl}/api/{version}/tags	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "Tag1", "description": "mar 28", "visibilty": "Public" }
Response	Content Type	application/json
HTTP Status	202 - OK	{ "id": 285452, "tenantId": "21", "name": "Tag1", "description": "mar 28", "visibilty": "Public", "accountId": null, "userId": "1bc17bfa-ad94-47ef-b750-259ca369161c", "creationTimestamp": "2022-03-28T05:42:23.481543Z", "modificationTimestamp": null }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Create Tag API	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.15.2 Update Tag API

API Interface	Update Tag API	
URL	https://{baseUrl}/api/{version}/tags	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "Mar11 reg", "description": "Mar11 reg public tag ", "visibilty": "Public", "id": 3023351, "accountId": "2" }
Response	Content Type	application/json
HTTP Status	202 - OK	{ "id": 3023351, "tenantId": "1", "name": "Mar11 reg", "description": "Mar11 reg public tag ", "visibilty": "Public", "accountId": "2", "userId": "b5734239-1f10-45cf-8926-fb6859275b76", "creationTimestamp": "2022-03-11T14:01:49.283312Z", "modificationTimestamp": "2022-03-21T11:36:50.491216Z" }
	401 - Unauthorized	No valid JWT token provided.

API Interface	Update Tag API	
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.15.3 Delete Tag API

API Interface	Delete Tag API	
URL	https://{baseUrl}/api/{version}/tags/3259401	
Request	Method: DELETE, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	204 – No Content	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.15.4 Assign Tag API

API Interface	Assign Tag API	
URL	https://{baseUrl}/api/{version}/subscription/assignTags	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface	Assign Tag API	
	body	{ "subscriptionIccIdList": ["8955644099100000914"], >tagIdList": [3259402] }
Response	Content Type	application/json
HTTP Status	202 - OK	{ "iccid": "8955644099100000914", "type": "success", >tag": "API", "message": "Assigned" }]]
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.15.5 Add Multiple Tags API

API Interface	Add Multiple Tags API	
URL	https://{baseUrl}/api/{version}/subscription/assignTags	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "subscriptionIccIdList": ["8955644099100000914"], >tagIdList": [2443051, 2443151, 2443303, 2443002] }
Response	Content Type	application/json

API Interface	Add Multiple Tags API	
HTTP Status	202 - OK	<pre> [[{ "iccid": "8955644099100000914", "type": "success", "tag": "Test Tag1", "message": "Assigned" }, { "iccid": "8955644099100000914", "type": "success", "tag": "NFT Tag", "message": "Assigned" }, { "iccid": "8955644099100000914", "type": "success", "tag": "stt", "message": "Assigned" }, { "iccid": "8955644099100000914", "type": "success", "tag": "tag123", "message": "Assigned" }]] </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.16 Custom Fields at SIM Level

5.16.1 Create Custom Fields at SIM Level

Description:

This API can be used to create custom fields at SIM level.

API Interface	Create Custom Fields at SIM Level	
URL	https://{baseUrl}/api/{version}/customfield	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "SC1", "description": "asdf", "type": "Text", "isPropagated": true }
Response	Content Type	application/json
HTTP Status	201 - Created	{ "id": 341706, "name": "SC1", "type": "Text", "tenantId": "21", "description": "asdf", "isPropagated": true, "accountId": "3907", "userId": "1bc17bfa-ad94-47ef-b750-259ca369161c", "creationTimestamp": "2022-05-05T02:56:37", "modificationTimestamp": "2022-05-05T02:56:37" }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Create Custom Fields at SIM Level	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.16.2 Edit Custom Fields at SIM Level

Description:

This API can be used to edit custom fields at SIM level.

API Interface	Edit Custom Fields at SIM Level	
URL	https://{baseUrl}/api/{version}/customfield	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "name": "SC1", "description": "asdfG", "type": "Text", "isPropagated": false, "id": 341706 }
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 341706, "name": "SC1", "type": "Text", "tenantId": "21", "description": "asdfG", "isPropagated": true, "accountId": "3907", "userId": "1bc17bfa-ad94-47ef-b750-259ca369161c", "creationTimestamp": "2022-05-05T02:56:37", "modificationTimestamp": "2022-05-05T02:56:37" }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Edit Custom Fields at SIM Level	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.16.3 Delete Custom Fields at SIM Level

Description:

This API can be used to delete custom fields at SIM level.

API Interface	Delete Custom Fields at SIM Level	
URL	https://{baseUrl}/api/{version}/customfield/341707	
Request	Method: DELETE, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	Custom Field Deleted Successfully.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.16.4 Update Custom Fields at SIM Level

Description:

This API can be used to update custom fields at SIM level.

API Interface	Update Custom Fields at SIM Level
URL	https://{baseUrl}/api/{version}/customfield/updateSubscriptionCustomField/285706

API Interface		Update Custom Fields at SIM Level
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "id": 338953, "name": "bulk CF2", "type": "Date", "value": "2022-05-05" }
Response	Content Type	application/json
HTTP Status	200 - OK	Custom Field Updated Successfully.
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.17 Reading CDR for Data

API Interface		Reading CDR for Data
URL	https://{baseUrl}/api/{version}/cdr-hdlr-service/cdr-data?msisdn=<string>&startDateTime=<ISODateString>&endDateTime=<ISODateString>&page=<int>&size=<int>	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'

API Interface		Reading CDR for Data
	Request Parameter	msisdn: <string> startDateTime: <isodatestring> startDateTime: <isodatestring> page: <integer> size: <integer>
Response	Content Type	application/json

	401 - Unauthorized	Not Authenticated
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Example:</p> <pre> curl -location -request GET 'https://{baseURL}/api/{version}/cdr-hdlr-service/cdr- data?msisdn=<msisdn>&startTime=< startTime>&endTime=<endTime>&page=0&size=50' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' --header 'Account-Context-Id: <ACCOUNT_ID>' "msisdn" is string "startTime" is date-time in iso format (yyyy-MM-dd'T'HH:mm:ss'Z') "endTime" is date-time in iso format (yyyy-MM-dd'T'HH:mm:ss'Z') </pre>		

5.18 Send Cancel Location of SIM

Description:

This API can be used to send the cancel location of 3G , 4G, or both SIM types.

API Interface		Send Cancel Location of SIM
URL	https://{baseUrl}/api/{version}/diagnostics/subscription/cancel_location	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{"imsi":"{IMSI}","cancelLocType":"{all/3G/4G}"}
Response	Content Type	Text
HTTP Status	200 – OK	2c236a87-a3e4-463a-baf9-ded07834c594
Notes:		
Send a POST request to the <i>/diagnostics/subscription/cancel_location</i>		
The response contains a unique batch UUID for the request.		
Use "Workflow Status API" to monitor the status of the workflow.		
Example:		
<pre>curl -location -request POST 'https://{baseUrl}/api/{version}/diagnostics/subscription/cancel_location' --header 'Authorization: Bearer <JWT-TOKEN>' --header 'Content-Type: application/json' -- header 'Account-Context-Id: <ACCOUNT_ID>' --data-raw '{Your input}'</pre>		

New APIs Added FEB 10

5.19 Status

Description:

This API is used to get the status of above operation, needs to pull this API until status is "failed or completed".

API Interface		Status
URL	https://wdh-sitstg2.nokiawing.com/api/v1/sim/<id>?includeTasks=false	
Request	Method: GET	

API Interface		Status
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	{ "ownerApp": "", "createTime": 1673528713035, "updateTime": 1673528713202, "status": "RUNNING", "endTime": 0, "workflowId": "0336e8b6-b108-4eaf-9d53-3610cb3276b7", "tasks": [], "input": { "imsi": "234500001310870", "cancelLocType": "4G" }, "output": {}, "taskToDomain": {}, "failedReferenceTaskNames": [], "workflowDefinition": {}, "priority": 0, "variables": {}, "lastRetriedTime": 0, "workflowName": "cancel_location_wf", "workflowVersion": 3, "startTime": 1673528713035 }
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Status	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.20 Update Group

Description:

This API can be used to update group.

API Interface	Update Group	
URL	https://{apiGateway}/api/{version}/api/sims/group	
Request	Method: PUT, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "accountId": 69, "iccid": "8955644099890130108", "imsi": "234500001310108", "groupId": 5053 }
Response	Content Type	application/json
HTTP Status	200 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
In case of remove group from sim,		

API Interface	Update Group
groupid will be Empty/null in body. <pre>{ "accountId": 69, "iccid": "8955644099890130108", "imsi": "234500001310108", "groupid": null }</pre>	

5.21 Get Subscriptions by ID/Includes

Description:

This API can be used to fetch subscriptions by ID/Includes.

API Interface	Get Subscriptions by ID / Includes	
URL	https :/{baseUrl}/api/{version}/graphql	
Request	Method: GET Graph QL	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Query Parameter	group_id, account { account_state tbl_groups { name id } }
	Request Parameter	query GetSubscriptionsById { simlcmangement_subscription_identity(where: {_and:[{id:{_eq:"2143820"}}, {account_id:{_eq:"6501"}}, {tenant_id:{_eq:"21"}},]}){id ,account_id ,account_name,iccid,imsi,msisdn,rate_plan_id,sta te_change_reason, apn_group_id,network_profile_id,roaming_profile_id, state_id,state_model_id,eid, custom_fields, state_change_lock,lc_state_insync

API Interface	Get Subscriptions by ID / Includes	
		<pre> network_profile { name rat_type }, apn_group { apn_group_name }, roaming_profile{ rp_name }, rate_plan { name plan_type subscription_type }, state { name }, subscription_tag_associations { id, tag { name id } }, group_id, account { account_state tbl_groups { name id } account_name : name }, session_states(limit: 1,order_by: {id: desc}) { id </pre>

API Interface		Get Subscriptions by ID / Includes
		<pre> session_id session_start_time session_end_time user_location_info sgsn_address sgsn_mcc_mnc pdp_address rat_type access_point_name input_usage_accumulation output_usage_accumulation } data_usage_online { accumulated_usage }, } } </pre>
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.22 Bulk SIM Subscription Group Assign

Description:

This API can be used to create bulk SIM subscriptions by group assignment.

API Interface		Bulk SIM Subscription Group Assign
URL	https://{{baseUrl}}/api/{{version}}/resources/batch/sims/update/group/list	
Request	Method: POST	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Request Parameter	{"iccid":["1955644099890004091","1955644099890004093","8955644500001090062","8955644500001090066"],"accountId":6501,"groupId":18401}
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.23 Group Subscriptions Single SIM

Description:

This API can be used to add group subscriptions to single SIM.

API Interface		Group Subscription Single SIM
URL	https://{{baseUrl}}/api/{{version}}/subscription/sims/group	
Request	Method: PUT	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Request Parameter	{"iccid":"1955644099890004111","imsi":"234509001014111","accountId":6501,"groupId":18351}
Response	Content Type	application/json

API Interface	Group Subscription Single SIM	
HTTP Status	200 – OK	
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

5.24 Get Audit History - SIM Life Cycle

Description:

This API is used to get the audit history for provided imsi.

API Interface	Get Audit History	
URL	https://{baseUrl}/api/{version}/getAuditTrail/{imsi}/{no of days}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	[{ "accountName": "Sample12", "userId": null, "action": "SIM_APNGROUP_CHANGE", "preValue": "\"Check12\"", "newValue": "\"NokiaWIng\"", "status": "FAILED", "dateExecution": "2023-02-21T11:06:28.655" }.....]

API Interface	Get Audit History	
		Data Types String accountName; String userId; String action; String preValue; String newValue; String status; Date dateExecution;
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 6

Automation Rules API

NOKIA

The background of the page is a vibrant blue. On the left side, there is a vertical dark blue bar. The bottom half of the page is dominated by a large, abstract graphic consisting of multiple overlapping, flowing white and light blue lines that create a sense of motion and depth, resembling a stylized wave or a digital signal.

6 Automation Rules API

6.1 Automation Rules for Resource Type Accounts

6.1.1 Create Automation Rule for Accounts

API Interface	Create Automation Rule for Accounts	
URL	https://{baseUrl}/api/{version}/automation-rules/automation-rule/{version}/monitored-rules	
Request	Method: POST, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ <pre> "ruleName": "API-Create", "endDate": "2022-05-31T00:00:00.000Z", "tenantId": "21", "resourceId": 1, "resourceName": "Account", "resourceMode": null, "resourceModelId": null, "resourceModeName": null, "resourceDetail1": 3339, "allItemEnabled": false, "monitoredTriggers": [{ "triggerTypeName": "", "triggerId": 32, "triggerName": "Active Subscription Count", "condition": { "value": "1", "unit": "", "location": "ALL", "locationId": "", "locationValue": "", "country": "", "zone": "" } } </pre> }

API Interface	Create Automation Rule for Accounts	
		<pre> }}, "notifications": [{ "id": "32", "name": "Send Email", "subject": "Active Subscription Count (Account: {name})", "receipt": "string", "message": "The Account ({name}) has reached the configured threshold ({value}) for Active Subscription Count" }}, "actions": [{ "name": "None" }}, "accountId": 3339 }] </pre>
Response	Content Type	application/json
HTTP Status	201 - Created	<pre> { "id": 2801, "ruleName": "API-Create", "description": null, "tenantId": "21", "accountId": "3339", "resourceId": 1, "resourceName": "Account", "resourceMode": null, "resourceModelId": null, "resourceModeName": null, "resourceDetail1": "3339", "allItemEnabled": false, "state": "Inactive", "endDate": "2022-05-31T00:00:00.000Z", "monitoredTriggers": [{ "id": 2851, "triggerId": 32, "triggerName": "Active Subscription Count", }] } </pre>

API Interface	Create Automation Rule for Accounts	
		<pre> "triggerTypeId": 5, "triggerTypeName": "Counter", "condition": { "country": "", "unit": "", "zone": "", "locationId": "", "location": "ALL", "value": "1", "locationValue": "" } }}, "notifications": [{ "subject": "Active Subscription Count (Account: {name})", "name": "Send Email", "recipient": "string", "id": "32", "message": "The Account ({name}) has reached the configured threshold ({value}) for Active Subscription Count" }], "actions": [{ "name": "None" }], "createdOn": "2022-05-26T07:38:38.190Z", "updatedOn": "2022-05-26T07:38:38.190Z" } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

6.1.2 Edit Automation Rule for Accounts

API Interface		Edit Automation Rule for Accounts
URL	https://{baseUrl}/api/{version}/automation-rules/automation-rule/{version}/monitored-rules	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "ruleName": "Test_1123", "endDate": "2022-05-31T00:00:00.000Z", "tenantId": "21", "description": null, "resourceId": 1, "resourceName": "Account", "resourceMode": null, "resourceModelId": null, "resourceModeName": null, "resourceDetail1": 4208, "allItemEnabled": false, "monitoredTriggers": [{ "triggerTypeId": 5, "triggerTypeName": "Counter", "triggerId": 32, "triggerName": "Active Subscription Count", "condition": { "value": "5", "unit": "", "location": "ALL", "locationId": "", "locationValue": "", "country": "", "zone": "" }, "id": 3253 }], "notifications": [{ "id": "32", "name": "Send Email", }] }

API Interface	Edit Automation Rule for Accounts	
		<pre> "subject": "Active Subscription Count (Account: {name})", "recipient": "string", "message": "The Account ({name}) has reached the configured threshold ({value}) for Active Subscription Count" }, "actions": [{ "name": "None" }], "id": 3203, "accountId": 4208 } </pre>
Response	Content Type	application/json
HTTP Status	200 - OK	<pre> { "id": 3203, "ruleName": "Test_1123", "description": null, "tenantId": "21", "accountId": "4208", "resourceId": 1, "resourceName": "Account", "resourceMode": null, "resourceModelId": null, "resourceModeName": null, "resourceDetail1": "4208", "allItemEnabled": false, "state": "Inactive", "endDate": "2022-05-31T00:00:00.000Z", "monitoredTriggers": [{ "id": 3253, "triggerId": 32, "triggerName": "Active Subscription Count", "triggerTypeId": 5, "triggerTypeName": "Counter", "condition": { "country": "", } }] </pre>

API Interface	Edit Automation Rule for Accounts	
		<pre> "unit": "", "zone": "", "locationId": "", "location": "ALL", "value": "5", "locationValue": "" } }}, "notifications": [{ "subject": "Active Subscription Count (Account: {name})", "name": "Send Email", "recipient": "string", "id": "32", "message": "The Account ({name}) has reached the configured threshold ({value}) for Active Subscription Count" }], "actions": [{ "name": "None" }], "createdOn": "2022-05-30T12:12:42.311Z", "updatedOn": "2022-05-30T12:13:24.041Z" } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

6.1.3 Delete Automation Rule for Accounts

API Interface	Delete Automation Rule for Accounts
URL	https://{baseURL}/api/{version}/automation-rules/automation-rule/{version}/monitored-rules/3203/Delete

API Interface		Delete Automation Rule for Accounts
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 - OK	{ "id": 3203, "ruleName": "Test_1123", "description": null, "tenantId": "21", "accountId": "4208", "resourceId": 1, "resourceName": "Account", "resourceMode": null, "resourceModelId": null, "resourceModeName": null, "resourceDetail1": "4208", "allItemEnabled": false, "state": "Deleted", "endDate": "2022-05-31T00:00:00.000Z", "monitoredTriggers": [{ "id": 3253, "triggerId": 32, "triggerName": "Active Subscription Count", "triggerTypeId": 5, "triggerTypeName": "Counter", "condition": { "country": "", "unit": "", "zone": "", "locationId": "", "location": "ALL", "value": "5", "locationValue": "" } }], "notifications": [{

API Interface	Delete Automation Rule for Accounts	
		<pre> "subject": "Active Subscription Count (Account: {name})", "name": "Send Email", "recipient": "string", "id": "32", "message": "The Account ({name}) has reached the configured threshold ({value}) for Active Subscription Count" }}, "actions": [{ "name": "None" }], "createdOn": "2022-05-30T12:12:42.311Z", "updatedOn": "2022-05-30T12:13:24.041Z" } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

6.2 Automation Rules for Resource Type Subscriptions (Event)

6.2.1 Create Automation Rule for Subscriptions - Event (All SIMs/ICCID/IMSI/Rate Plan/Tag)

API Interface	Create Automation Rule for Subscriptions - Event	
URL	https://{baseURL}/api/{version}/automation-rules/automation-rule/{version}/monitored-rules	
Request	Method: POST, Content type: application/json	
	header	<pre> 'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>' </pre>

API Interface	Create Automation Rule for Subscriptions - Event	
	body	<pre> { "ruleName": "Test_234", "endDate": "2022-05-31T00:00:00.000Z", "tenantId": "21", "resourceId": 3, "resourceName": "Subscription", "resourceMode": "All_Subscription/ICCID/IMSI/Rate Plan/Tag", "resourceModelId": null, "resourceModeName": null, "resourceDetail1": null, "allItemEnabled": true, "monitoredTriggers": [{ "triggerTypeId": 1, "triggerTypeName": "Event", "triggerId": 1, "triggerName": "Data Session Start/Data Session End/Data Security Policy violation/SIM Status Changed/SIM IMEI changed/SIM Rate Plan Changed/SIM Location (Country) Changed/SMS Security Policy violation / Registration in a Zone ", "condition": { "value": "", "unit": "", "location": "ALL", "locationId": "", "locationValue": "", "country": "", "zone": "" } } }], "notifications": [{ "id": "1", "name": "Send Email/Send SMS/None", "subject": "Data Session Start - Billing Cycle (IMSI: {imsi})", "recipient": "string", "message": "The condition Data Session Start - Billing Cycle has been met for the Subscription (IMSI : {imsi})/ IMSI: {imsi} Data Session Start - Billing Cycle Value: {value}." }] </pre>

API Interface		Create Automation Rule for Subscriptions - Event
		<pre> }}, "actions": [{ "name": "None/Suspend/Change Rate Plan" }], "accountId": 4208 } </pre>
Response	Content Type	application/json

API Interface	Delete Automation Rule for Rate Plan – All Triggers	
		<pre> }}, "createdOn": "2022-06-17T16:04:10.743Z", "updatedOn": "2022-06-17T16:20:27.648Z" } } } } } </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 7

Reports API

NOKIA

7 Reports API

7.1 Get All Reports

Description:

Get metadata for all canned reports available for the user role.

API Interface	Get All Reports	
URL	https://{apiGateway}/api/{version}/cannedReport	
Request	Method: GET, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	202 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

7.2 Enable Report by ID

Description:

Enable a canned report and GUI hosting for an enterprise account via API.

API Interface	Enable Report by ID
URL	https://{apiGateway}/api/{version}/cannedReport/enableReportById/{id}
Request	Method: PUT, Content type: application/json

API Interface		Enable Report by ID
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": "string", "active": true, "contentType": "string", "createdBy": 0, "encrypted": true, "id": 0, "lastUpdatedBy": 0, "query": "string", "reportExpiryDays": "string", "reportLevel": "string", "reportSchedule": { "active": true, "folderPath": "string", "id": 0, "reportEnabledOn": "string", "reportMetaDataID": 0, "schedulePeriod": "string", "scheduleTime": "string" }, "reportTemplateName": "string", "responseFormat": "string", "roleName": ["string"], "template": true, "tenantId": 0 }
Response	Content Type	Text
HTTP Status	202 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Enable Report by ID	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

7.3 Disable Report by ID

Description:

Disable a canned report and GUI hosting for an enterprise account via API.

API Interface	Disable Report by ID	
URL	https://{apiGateway}/api/{version}/cannedReport/disableReportById/{id}	
Request	Method: PUT, Content type: application/json	
	header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	body	{ "accountId": "string", "active": true, "contentType": "string", "createdBy": 0, "encrypted": true, "id": 0, "lastUpdatedBy": 0, "query": "string", "reportExpiryDays": "string", "reportLevel": "string", "reportSchedule": { "active": true, "folderPath": "string", "id": 0, "reportEnabledOn": "string", "reportMetaDatalD": 0, "schedulePeriod": "string", "scheduleTime": "string" }, "reportTemplateName": "string",

API Interface		Disable Report by ID
		<pre>"responseFormat": "string", "roleName": ["string"], "template": true, "tenantId": 0 }</pre>
Response	Content Type	Text
HTTP Status	202 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

7.4 Download Report by ID

Description:

Download contents of a single canned report. Response will contain binary data for a single report.

API Interface		Download Report by ID
URL	https://{apiGateway}/api/{version}/downloadReport/{id}	
Request	Method: GET, Content type: application/json	
	header	<pre>'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'</pre>
Response	Content Type	Text
HTTP Status	202 - OK	
	401 - Unauthorized	No valid JWT token provided.

API Interface	Download Report by ID	
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

7.5 Trigger a Report On-Demand

Description:

Manually start the process to collect data and prepare the specific report in context via GUI. This action is performed by users with roles such as enterprise admin or enterprise user.

API Interface	Trigger a Report On-Demand	
URL	https://{apiGateway}/api/{version}/runReport/{id}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	202 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

New APIs – FEB 13

Chapter 8

SIM Order APIs

NOKIA

8 SIM Order APIs

The following section specifies the APIs for Sim Order.

The root URL resource for all SIM Order functions is:

<https://{baseUrl}/api/{version}/sim-ordering/>

{baseUrl} example: wdh-sitstg2.nokiawing.com

{version} example: v1

8.1 Order Details APIs

8.1.1 Create Order

Description: This API can be used to create an Order for Sim.

API Interface	Create Order	
URL	https://{apiGateway}/api/{version}/sim-ordering/createOrder	
Request	Method: POST, Content type: application/json	
	Header	X-Tenant-Id, Account-Context-Id
	Body	<pre>{ "tenantId": 7, "accountMasterId": 26, "orderType": "SIM", "productCatalogueId": 9951, "productQty": 12, "poNumber": "1", "orderOwnerName": "test4444444", "orderOwnerEmail": "test@test.com", "orderOwnerPhone": "111111111", "orderShippingComments": "test", "contactPersonName": "test", "contactPersonEmail": "test@test.com", "contactPersonPhone": "23423424",</pre>

API Interface	Create Order
	<pre> "deliveryAddressLine1": "test", "deliveryAddressLine2": "test", "deliveryAddressCity": "test", "deliveryAddressState": "test", "deliveryAddressCountry": "India", "orderComments": "test", "orderApnGroup": "lab.B01wing", "orderNetworkProfile": "ALL Services", "orderRoamingProfile": "ALLPLMN", "orderRatePlan": "Nokia Rate plan for invoice testing", "linkedOrderId": 1, "linkedOrderComments": null, "orderStatus": "SUBMITTED", "orderSubmittedDate": "2022-11-07T04:50:43.418Z", "orderOnholdDate": "2022-11-07T04:51:03.37Z", "orderOnholdReason": "", "orderApprovedDate": "2022-11-07T04:51:27.417Z", "orderApprovedComments": "TEST", "orderCompletedDate": "2022-11-07T10:02:38.287Z", "orderCompletedComments": "", "orderCancelledDate": null, "orderCancelledReason": "", "trackingDetails": "tracking info", "attachments": "/simorder/sim/SIM_BULK_CHANGE.csv_12251", "postCode": null, "businessName": "test", "note": "test note", "defaultOwnerDetails": false, "defaultShippingDetails": false, "creationTimestamp": "2022-11-07T04:50:16.071Z", "modificationTimestamp": "2022-11-07T10:02:38.287Z" } </pre>

API Interface	Create Order	
	Body Datatypes	Field: Datatype "tenantId": int, "accountMasterId": int, "orderType": "string", "productCatalogueId": int, "productQty": int, "poNumber": "string", "orderOwnerName": "string", "orderOwnerEmail": "string", "orderOwnerPhone": "string", "orderShippingComments": "string", "contactPersonName": "string", "contactPersonEmail": "string", "contactPersonPhone": "string", "deliveryAddressLine1": "string", "deliveryAddressLine2": "string", "deliveryAddressCity": "string", "deliveryAddressState": "string", "deliveryAddressCountry": "string", "orderComments": "string", "orderApnGroup": "string", "orderNetworkProfile": "string", "orderRoamingProfile": "string", "orderRatePlan": "string", "linkedOrderId": int, "linkedOrderComments": "string", "orderStatus": "SUBMITTED", "orderSubmittedDate": ZonedDateTime, "orderOnholdDate": ZonedDateTime "orderOnholdReason": "string", "orderApprovedDate": ZonedDateTime, "orderApprovedComments": "string", "orderCompletedDate": ZonedDateTime "orderCompletedComments": "string", "orderCancelledDate": ZonedDateTime "orderCancelledReason": "string", "trackingDetails": "string",

API Interface		Create Order
		<pre>"attachments": "string", "postCode": "string", "businessName": "string", "note": "string", "defaultOwnerDetails": true, "defaultShippingDetails": true, "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime</pre>
Response	Content Type	application/json
HTTP Status	200 – OK	Order Created
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Notes:</p> <ol style="list-style-type: none"> 1. Body has mentioned only respective data types 2. Order status allowed only SUBMITTED for create order 		

8.1.2 Update Order

Description:

This API is used to Update an Order.

API Interface		Update Order
URL	https://{apiGateway}/api/{version}/sim-ordering/updateOrder/{id}	
Request	Method: PUT, Content type: application/json	
	Header	X-Tenant-Id, Account-Context-Id, id

API Interface	Update Order	
	Body	<pre> { "id": 5651, "tenantId": 7, "accountMasterId": 26, "orderType": "SIM", "productCatalogueId": 9951, "productQty": 12, "poNumber": "1", "orderOwnerName": "test4444444", "orderOwnerEmail": "test@test.com", "orderOwnerPhone": "11111111122", "orderShippingComments": "test", "contactPersonName": "test", "contactPersonEmail": "test@test.com", "contactPersonPhone": "23423424", "deliveryAddressLine1": "test", "deliveryAddressLine2": "test", "deliveryAddressCity": "test", "deliveryAddressState": "test", "deliveryAddressCountry": "India", "orderComments": "test", "orderApnGroup": "lab.B01wing", "orderNetworkProfile": "ALL Services", "orderRoamingProfile": "ALLPLMN", "orderRatePlan": "Nokia Rate plan for invoice testing", "linkedOrderId": 1, "linkedOrderComments": null, "orderStatus": "SUBMITTED", "orderSubmittedDate": "2022-11-07T04:50:43.418Z", "orderOnholdDate": "2022-11-07T04:51:03.37Z", "orderOnholdReason": "", "orderApprovedDate": "2022-11-07T04:51:27.417Z", "orderApprovedComments": "TEST", "orderCompletedDate": "2022-11-07T10:02:38.287Z", "orderCompletedComments": "", "orderCancelledDate": null, "orderCancelledReason": "", "trackingDetails": "tracking info", "attachments": "/simorder/sim/SIM_BULK_CHANGE.csv_12251", "postCode": null, "businessName": "test", "note": "test note", "defaultOwnerDetails": false, "defaultShippingDetails": false, "creationTimestamp": "2022-11-07T04:50:16.071Z", "modificationTimestamp": "2022-11-07T10:02:38.287Z"} </pre>

API Interface		Update Order
	Body Datatype	Field: Datatype "id": long "tenantId": int, "accountMasterId": int, "orderType": "string", "productCatalogueId": int, "productQty": int, "poNumber": "string", "orderOwnerName": "string", "orderOwnerEmail": "string", "orderOwnerPhone": "string", "orderShippingComments": "string", "contactPersonName": "string", "contactPersonEmail": "string", "contactPersonPhone": "string", "deliveryAddressLine1": "string", "deliveryAddressLine2": "string", "deliveryAddressCity": "string", "deliveryAddressState": "string", "deliveryAddressCountry": "string", "orderComments": "string", "orderApnGroup": "string", "orderNetworkProfile": "string", "orderRoamingProfile": "string", "orderRatePlan": "string", "linkedOrderId": int, "linkedOrderComments": "string", "orderStatus": "SUBMITTED", "orderSubmittedDate": ZonedDateTime, "orderOnholdDate": ZonedDateTime "orderOnholdReason": "string", "orderApprovedDate": ZonedDateTime, "orderApprovedComments": "string", "orderCompletedDate": ZonedDateTime "orderCompletedComments": "string", "orderCancelledDate": ZonedDateTime "orderCancelledReason": "string", "trackingDetails": "string", "attachments": "string", "postCode": "string", "businessName": "string", "note": "string", "defaultOwnerDetails": true, "defaultShippingDetails": true, "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – Updated	

API Interface	Update Order	
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.3 Update Order Tracking Details

Description:

This API allows updating of Order Tracking Details.

API Interface	Update Order Tracking Details	
URL	https://{apiGateway}/api/{version}/sim-ordering/orderTrackingDetails/{id}	
Request	Method: PUT, Content type: application/json	
	Header	X-Tenant-Id, Account-Context-Id, id
	Parameters	trackingInfo: String
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.4 Update Order Note Details

Description:

This API allows updating of Order Note Details.

API Interface		Update Order Note Details
URL	https://{apiGateway}/api/{version}/ sim-ordering/orderNoteDetails/{id}	
Request	Method: PUT, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' Account-Context-Id
	Parameters	Id: int Note: string
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.5 Upload Attachment

Description:

This API is used to upload an attachment.

API Interface		Upload Attachment
URL	https://{apiGateway}/api/{version}/ sim-ordering/uploadAttachment/{id}	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' Account-Context-Id
	Body	File: CSV file
Response	Content Type	application/json
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Upload Attachment	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.6 Download Attachment

Description:

This API is used to Download an attachment.

API Interface	Download Attachment	
URL	https://{apiGateway}/api/{version}/sim-ordering/downloadAttachment/{id}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' Account-Context-Id
	Parameters	Id: int
Response	Content Type	application/json?
HTTP Status	200 – OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.7 Get Order Details

Description:

This API can be used to fetch order details.

API Interface	Get Order Details	
URL	https://{apiGateway}/api/{version}/sim-ordering/orderDetails/{id}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 – OK	Order details fetched
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.1.8 Delete Order Details

Description:

This API can be used to Delete order details.

API Interface	Delete Order Details	
URL	https://{apiGateway}/api/{version}/sim-ordering/deleteorder/{id}	
Request	Method: DELETE, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	application/json
HTTP Status	200 – OK	Order details Deleted
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Delete Order Details	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.2 Account Default Resource

8.2.1 Create Account Default

Description: This API is used to create an Account Default

API Interface	Create Account Default	
URL	https://{apiGateway}/api/{version}/sim-ordering/createAccountDefault	
Request	Method: POST, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
	Body	<pre>{ "tenantId": "1", "accountId": 285, "ownerName": "prabhuram", "ownerEmail": "prabhuram.mrugesan.ext@nokia.com", "ownerPhone": "11111111111", "contactName": "prabhuram", "contactPhoneNumber": "1111111", "businessName": "test", "contactEmail": "prabhuram.mrugesan.ext@nokia.com", "addressOne": "test", "addressTwo": "test", "zipcode": "1111111", "city": "test", "state": "test", "country": "India", "recipientEmail": "prabhuram.mrugesan.ext@nokia.com", "creationTimestamp": null, "modificationTimestamp": null }</pre>

API Interface		Create Account Default
	Body Datatype	Field: Datatype "tenantId": "string", "accountId": int, "ownerName": "string", "ownerEmail": "string", "ownerPhone": "string", "contactName": "string", "contactPhoneNumber": "string", "businessName": "string", "contactEmail": "string", "addressOne": "string", "addressTwo": "string", "zipcode": "string", "city": "string", "state": "string", "country": "string", "recipientEmail": "string", "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – OK	Created
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.2.2 Update Account Default

Description:

This API is used to Update an Account Default.

API Interface		Update Account Default
URL	https://{apiGateway}/api/{version}/sim-ordering/updateAccountDefault/{accountdefaultId}	
Request	Method: PUT, Content type: application/json	
	Header	Account-Context-Id, X-Tenant-Id
	Body	<pre>{ "tenantId": "1", "accountId": 285, "ownerName": "prabhuram", "ownerEmail": "prabhuram.mrugesan.ext@nokia.com", "ownerPhone": "11111111111", "contactName": "prabhuram", "contactPhoneNumber": "1111111", "businessName": "test", "contactEmail": "prabhuram.mrugesan.ext@nokia.com", "addressOne": "test", "addressTwo": "test", "zipcode": "1111111", "city": "test", "state": "test", "country": "India", "recipientEmail": "prabhuram.mrugesan.ext@nokia.com", "creationTimestamp": null, "modificationTimestamp": null }</pre>
	Body Datatypes	Field: Datatype "id" : long "tenantId": "string", "accountId": int, "ownerName": "string", "ownerEmail": "string", "ownerPhone": "string", "contactName": "string", "contactPhoneNumber": "string", "businessName": "string", "contactEmail": "string", "addressOne": "string", "addressTwo": "string", "zipcode": "string", "city": "string", "state": "string", "country": "string", "recipientEmail": "string", "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – OK	Updated

API Interface	Update Account Default	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.2.3 Get Account Default

Description:

This API can be used to fetch an Account Default.

API Interface	Get Account Default	
URL	https://{apiGateway}/api/{version}/sim-ordering/getAccountDefault/{accountId}	
Request	Method: GET, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
Response	Content Type	application/json
HTTP Status	200 – OK	Account Default details fetched
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.3 Product Catalogue Resource

8.3.1 Update Product Catalogue

Description:

This API is used to Update a product Catalogue.

API Interface		Update Product Catalogue
URL	https://{apiGateway}/api/{version}/sim-ordering/simProducts/updateProduct/{id}	
Request	Method: PUT, Content type: application/json	
	Header	Account-Context-Id, X-Tenant-Id
	Body	<pre>{ "id": 10401, "tenantId": "string", "productType": "string", "productNumber": "string", "productName": "string", "formFactor": "string", "branding": "string", "hardware": "string", "software": "string", "productPrice": "string", "status": "DRAFT", "creationTimestamp": "2022-12-13T17:23:28.532Z", "modificationTimestamp": "2022-12-13T17:23:28.532Z" }</pre>
	Body Datatypes	Field: datatype "id": long, "tenantId": "string", "productType": "string", "productNumber": "string", "productName": "string", "formFactor": "string", "branding": "string", "hardware": "string", "software": "string", "productPrice": "string", "status": "DRAFT", "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – OK	Updated
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface		Update Product Catalogue
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.3.2 Create Product Catalogue

Description: This API is used to create a Product Catalogue

API Interface		Create Product Catalogue
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/addProduct	
Request	Method: POST, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
	Body	<pre>{ "tenantId": "string", "productType": "string", "productNumber": "string", "productName": "string", "formFactor": "string", "branding": "string", "hardware": "string", "software": "string", "productPrice": "string", "status": "DRAFT", "creationTimestamp": "2022-12-13T17:23:28.532Z", "modificationTimestamp": "2022-12-13T17:23:28.532Z" }</pre>
	Body Datatypes	Field: datatype "id": long, "tenantId": "string", "productType": "string", "productNumber": "string", "productName": "string", "formFactor": "string", "branding": "string", "hardware": "string", "software": "string", "productPrice": "string",

API Interface	Create Product Catalogue	
		"status": "DRAFT", "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – OK	Created
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Status: DRAFT UNDER_REVIEW APPROVED LOCKED ARCHIVED DELETE		

8.3.3 Get Product

Description:

This API can be used to fetch Product.

API Interface	Get Product	
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/getProduct	
Request	Method: GET, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
Response	Content Type	application/json
HTTP Status	200 – OK	Product details fetched
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Get Product	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.3.4 Delete Product

Description:

This API can be used to Delete a Product.

API Interface	Delete Product	
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/deleteProduct/{id}	
Request	Method: DELETE, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
Response	Content Type	application/json
HTTP Status	200 – OK	Product details Deleted
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.4 User Group Resource

8.4.1 Add User Group

Description: This API is used to add an user group.

API Interface	Add User Group	
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/addUserGroup	
Request	Method: POST, Content type: application/json	

API Interface	Add User Group	
	Header	X-Tenant-Id
	Body	{ "tenantId": "1", "email": "nokiatestwing1@gmail.com", "userGroupId": "", "type": "orderSubmitted", "archived": true, "creationTimestamp": "2022-12-09T12:28:18.528Z", "modificationTimestamp": "2022-12-09T12:28:18.528Z" }
	Body Datatype	Field: Datatype "tenantId": "string", "email": "string", "userGroupId": "string", "type": "string", "archived": true, "creationTimestamp": ZonedDateTime, "modificationTimestamp": ZonedDateTime
Response	Content Type	application/json
HTTP Status	200 – OK	Added User Group
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.4.2 Update User Group

Description:

This API is used to Update a user group.

API Interface		Update User Group
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/addUserGroup	
Request	Method: PUT, Content type: application/json	
	header	Account-Context-Id , X-Tenant-Id
	body	[<pre>{ "id": 0, "tenantId": "string", "email": "string", "userGroupId": "string", "type": "string", "archived": true, "creationTimestamp": "2023-02-24T09:40:20.201Z", "modificationTimestamp": "2023-02-24T09:40:20.201Z" }</pre>]
Response	Content Type	application/json
HTTP Status	200 – OK	Updated
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.4.3 Get User Group

Description:

This API can be used to fetch a User Group.

API Interface		Get User Group
URL	https://{apiGateway}/api/{version}/ sim-ordering/simProducts/addUserGroup	
Request	Method: GET, Content type: application/json	
	Header	X-Tenant-Id
Response	Content Type	application/json

API Interface	Get User Group	
HTTP Status	200 – OK	User Group details fetched
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.5 Product Account Assignment

8.5.1 Add Product Account Assignment

Description: This API is used to add a Product Account Assignment.

API Interface	Add Product Account Assignment	
URL	https://{apiGateway}/api/{version}/sim-ordering/product-account-assignments	
Request	Method: POST, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
	Body	<pre>{ "tenantId": 1, "accountId": 285, "defaultPrice": true, "customerPrice": 1, "moq": 1, "productId": 10401 }</pre>
Response	Content Type	application/json
HTTP Status	200 – OK	Added
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.

API Interface	Add Product Account Assignment	
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.5.2 Update Product Account Assignment

Description:

This API is used to Update a product account assignment.

API Interface	Update User Group	
URL	https://{apiGateway}/api/{version}/sim-ordering/product-account-assignments/{id}	
Request	Method: PUT, Content type: application/json	
	Header	Account-Context-Id , X-Tenant-Id
	Body	<pre>{ "tenantId": 1, "accountId": 285, "defaultPrice": true, "customerPrice": 1, "moq": 1, "productId": 10401 }</pre>
	Body datatype	Filed: datatype "id": long, "tenantId": int, "productId": int, "accountId": int, "defaultPrice": boolean, "customerPrice": int, "moq": int
Response	Content Type	application/json
HTTP Status	200 – OK	Updated
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Update User Group	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.5.3 Get Product Account Assignment

Description:

This API can be used to fetch a Product Account Assignment.

API Interface	Get Product Account assignment	
URL	https://{apiGateway}/api/{version}/sim-ordering/product-account-assignments/{productCatalogueId}	
Request	Method: GET, Content type: application/json	
	Header	Account-Context-Id, X-Tenant-Id
Response	Content Type	application/json
HTTP Status	200 – OK	Product Account Assignment details fetched
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

8.5.4 Delete Product Account Assignment

Description:

This API can be used to Delete a Product Account Assignment.

API Interface	Delete Product Account Assignment	
URL	https://{apiGateway}/api/{version}/sim-ordering/product-account-assignments/{productCatalogueId}/{accountId}	
Request	Method: DELETE, Content type: application/json	

API Interface		Delete Product Account Assignment
	Header	Account-Context-Id , X-Tenant-Id
Response	Content Type	application/json
HTTP Status	200 – OK	Product Account Assignment details Deleted
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 9

Notification Service

NOKIA

9 Notification Service

The following section specifies the APIs for Notification Service

{Version} example: v1

{baseUrl} example: wdh-sitstg2.nokiawing.com

9.1 Search SMS

Description:

This API is used to search SMS in a date range.

API Interface		Search SMS
URL	https://{baseUrl}/api/{Version}/notification/sms/searchsms	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	<pre>{ "iccid":"8955644500001089016", "fromdate":"2023-02-14", "todate":"2023-02-16", (optional) "messagetype":"AO/MT" (optional) }</pre> <p>Data Types</p> <ul style="list-style-type: none"> String iccid; String accountid; String fromdate; String todate; String messagetype; <p>Possible values :: messagetype : "AO/MT" or "MO/AT"</p>
Response	Content Type	Text
HTTP Status	200 – OK	[{

API Interface	Search SMS	
		<pre> "id": 121, "messageText": "Session1", "eventTime": "2023-02-13T20:31:03.488+00:00", "originationMSISDN": "1234", "destinationMSISDN": "882362000349016", "iccid": "8955644500001089016", "accountId": "3034", "messageType": "AO/MT", "status": "Message Sent" },.....] Data Types Long id; String messageText; Date eventTime; String originationMSISDN; String destinationMSISDN; String iccid; String accountId; String messageType; String status; </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

9.2 Get SMS Details

Description:

This API is used to fetch SMS details

API Interface		Get SMS Details
URL	https://{baseUrl}/api/{Version}/notification/sms/getsmsdetails/{id}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN> 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	<pre>{ "id": 121, "messageText": "Session1", "eventTime": "2023-02-13T20:31:03.488+00:00", "originationMSISDN": "1234", "destinationMSISDN": "882362000349016", "iccid": "8955644500001089016", "accountId": "3034", "messageType": "AO/MT", "status": "Message Sent" }</pre> <p>Data Types</p> <ul style="list-style-type: none"> Long id; String messageText; Date eventTime; String originationMSISDN; String destinationMSISDN; String iccid; String accountId; String messageType; String status;
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.

API Interface	Get SMS Details	
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

9.3 Send SMS

Description:

This API is used to send SMS to devices.

API Interface	Send SMS	
URL	https://{baseUrl}/api/v{Version}/notification/sms/sendsms	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "to": "<MSIDN1>,<MSIDN2>,<MSIDN3>,<MSIDN4>,<MSIDN5>,<MSIDN6>,<MSIDN7>,<MSIDN8>,<MSIDN9>,<MSIDN10>,<MSIDN11>,<MSIDN12>,<MSIDN13>,<MSIDN14>,<MSIDN15>,<MSIDN16>,<MSIDN17>,<MSIDN18>,<MSIDN19>,<MSIDN20>,<MSIDN21>,<MSIDN22>,<MSIDN23>,<MSIDN24>,<MSIDN25>,<MSIDN26>,<MSIDN27>,<MSIDN28>,<MSIDN29>,<MSIDN30>,<MSIDN31>,<MSIDN32>,<MSIDN33>,<MSIDN34>,<MSIDN35>,<MSIDN36>,<MSIDN37>,<MSIDN38>,<MSIDN39>,<MSIDN40>,<MSIDN41>,<MSIDN42>,<MSIDN43>,<MSIDN44>,<MSIDN45>,<MSIDN46>,<MSIDN47>,<MSIDN48>,<MSIDN49>,<MSIDN50>,<MSIDN51>,<MSIDN52>,<MSIDN53>,<MSIDN54>,<MSIDN55>,<MSIDN56>,<MSIDN57>,<MSIDN58>,<MSIDN59>,<MSIDN60>,<MSIDN61>,<MSIDN62>,<MSIDN63>,<MSIDN64>,<MSIDN65>,<MSIDN66>,<MSIDN67>,<MSIDN68>,<MSIDN69>,<MSIDN70>,<MSIDN71>,<MSIDN72>,<MSIDN73>,<MSIDN74>,<MSIDN75>,<MSIDN76>,<MSIDN77>,<MSIDN78>,<MSIDN79>,<MSIDN80>,<MSIDN81>,<MSIDN82>,<MSIDN83>,<MSIDN84>,<MSIDN85>,<MSIDN86>,<MSIDN87>,<MSIDN88>,<MSIDN89>,<MSIDN90>,<MSIDN91>,<MSIDN92>,<MSIDN93>,<MSIDN94>,<MSIDN95>,<MSIDN96>,<MSIDN97>,<MSIDN98>,<MSIDN99>,<MSIDN100>"," "message": "<YOUR MESSAGE>" }
Response	Content Type	Text
HTTP Status	200 - OK	
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 10

Probe Handler

NOKIA

10 Probe Handler

This section specifies the APIs for Probe Handler.

{Version} example: v1

{baseUrl} example: wdh-sitstg2.nokiawing.com

10.1 Get Network Registration Details

Description:

This API is used to fetch network registration details

API Interface		Get Network Registration Details
URL	https://{baseUrl}/api/{Version}/probes/network-registration/{imsi}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	{ "iccid": "8943050806272021348", "imsi": "232050300452139", "msisdn": "436996100097928", "networkName": "Hutchison Drei Austria GmbH", "country": "Austria", "ratType": "GERAN (2G)", "sgsn": "436990071412", "mme": "222", "vlr": "436990071301", "location": "32F2500C307610", "address": "194.24.157.5", "apn": "m2m.drei.at", "lastRegistered3G": "2023-02-27T15:08:35Z", "lastRegistered4G": null

API Interface	Get Network Registration Details	
		<pre> } Data Types String iccid; String imsi; String msisdn; String networkName; String country; String ratType; String sgsn; String mme; String vlr; String location; String address; String apn; String lastRegistered3G; // date in iso 8601 String lastRegistered4G; // date in iso 8601 </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 11

Rest Gateway APIs

NOKIA

11 Rest Gateway APIs

The following section specifies Rest Gateways APIs.

{Version} example: v1

{baseURL} example: wdh-sitstg2.nokiawing.com

11.1 Get Device Usage

Description:

This API is used to fetch device usage details

API Interface	Get Device Usage	
URL	https://{baseURL}/api/{version}/channel-manager/subscription/{iccid}/usages?usageType={Online}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text

API Interface	Get Device Usage	
		String imsi; String msisdn; String imei; String simState; String ratePlan; long dataUsage; long smsUsage; long voiceUsage;
	401 - Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

11.2 Get Device Usage by Zone

Description:

This API is used to fetch device usage details by zone

API Interface	Get Device Usage by Zone	
URL	https://{baseUrl}/api/{version}/channel-manager/subscription/{iccid}/usageInZone?usageType={Online}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 – OK	<pre>{ "iccid": "8988217755520000031", "imsi": "901161697004975", "msisdn": "882351697004975",</pre>

API Interface	Get Device Usage by Zone	
		<pre> "imei": "896045549689078", "simState": "ACTIVE", "timeStamp": "2016-11-10T05:31:17.557Z", "billCycleStartDate": "2016-10-31T10:30:00.000Z", "billCycleEndDate": "2016-11-30T10:29:59.000Z", "billCycleUsageInZones": { "Rate Plan A, 1": [{ "ratePlan": "Rate Plan A", "ratingZone": "default zone", "dataUsage": 0, "dataUsageUnit": "Bytes", "smsMoUsage": 0, "smsMtUsage": 0, "voiceMoUsage": 0, "voiceMoUsageUnit": "Seconds", "voiceMtUsage": 600, "voiceMtUsageUnit": "Seconds" }], "Rate Plan B, 2": [{ "ratePlan": "Rate Plan B", "ratingZone": "default zone", "dataUsage": 943718, "dataUsageUnit": "Bytes", "smsMoUsage": 0, "smsMtUsage": 0, "voiceMoUsage": null, "voiceMoUsageUnit": "Seconds", "voiceMtUsage": 943718, "voiceMtUsageUnit": "Seconds", }] } </pre>

		<pre>] } } DATA TYPES String iccid; String imsi; String msisdn; String imei; String simState; Date timeStamp; Date billCycleStartDate; Date billCycleEndDate; String ratePlan; String ratingZone; long dataUsage; String dataUsageUnit; long smsMoUsage; long smsMtUsage; long voiceMoUsage; String voiceMoUsageUnit; long voiceMtUsage; String voiceMtUsageUnit; </pre>
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

11.3 Get Session Details

Description:

This API is used to fetch session details.

API Interface	Get Session Details	
URL	https://{baseUrl}/api/{Version}/channel-manager/subscription/{iccid}/sessionInfo?usageType={Online/Offline}	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 – OK	<pre>{ "iccid": "8955644099890132669", "sessionId": "cmg.epc.mnc099.mcc404.3gppnetwork.org;11895c23;63e38 b89;234500001312669-16967125", "sessionStatus": "Active", "sessionStartTime": "2023-02-8T06:16:17.000+00:00", "sessionEndTime": "2023-02-08T06:16:17.000+00:00", "ipAddress": "10.16.153.2", "apnName": "elektratest", "deviceLocation": "046480000004648000000000", "ratType": 6, "sgsnAddress": "135.87.3.186" }</pre> <p>Data Types</p> <ul style="list-style-type: none"> String iccid; String sessionId; String sessionStatus; Date sessionStartTime; Date sessionEndTime; String ipAddress; String apnName; String deviceLocation; int ratType; String sgsnAddress;
	401 - Unauthorized	No valid JWT token provided.

API Interface	Get Session Details	
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
Notes:		
Session details will be shared only for active sessions or ongoing sessions.		
Last session details will be shared if in case there is no active session		

11.4 Get Usage by Rate Plan

Description:

This API is used to fetch usage details by rate plan.

API Interface	Get Usage by Rate Plan	
URL	https://{baseUrl}/api/{Version}/channel-manager/usages?usageType={Online }&ratePlanName={ratePlanName}&accountName={accountName }&page={ pageNumber }&size={ pageSize }	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	{ "ratePlanId": 200467, "ratePlanType": "Individual Bundle", "accountId": 7412, "accountName": "RAM_TESTING_2023", "zones": [{ "zone": "Ram-Mutiple Zone", "subscriptions": [{ "iccid": "8955644099890132791", "imsi": "234500001312791",

API Interface	Get Usage by Rate Plan	
		<pre> "msisdn": "882362001032791", "usage": { "dataUsage": 6168045, "smsMoUsage": 0, "smsMtUsage": 0, "voiceMoUsage": 0, "voiceMtUsage": 0 } }], { "zone": "Default Zone", "subscriptions ": [{ "iccid": "8955644099890132791", "imsi": "234500001312791", "msisdn": "882362001032791", "usage": { "dataUsage": 0, "smsMoUsage": 0, "smsMtUsage": 0, "voiceMoUsage": 0, "voiceMtUsage": 0 } }] }], "pageNumber": 0 } </pre> <p>DATA TYPES</p> <ul style="list-style-type: none"> long ratePlanId; int accountId; String accountName; String iccid; String imsi; String msisdn; String ratePlanType; String zone;

API Interface	Get Usage by Rate Plan	
		long dataUsage; long smsMoUsage; long smsMtUsage; long voiceMoUsage; long voiceMtUsage;
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 12

Channel Management

NOKIA

The background of the slide is a vibrant blue. In the lower half, there are several overlapping, flowing, and semi-transparent white and light blue lines that create a sense of motion and depth, resembling a stylized wave or a digital signal. The lines are most concentrated in the bottom left and right corners, with a bright white glow at their base.

12 Channel Management

This section specifies Channel Management APIs.

{Version} example: v1

{baseUrl} example: wdh-sitstg2.nokiawing.com

12.1 Send PoD

Description:

This API is used to send PoD

API Interface	Send PoD	
URL	https://{baseUrl}/api/{Version}/channel-manager/terminateSession	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "imsi": "", "channel": "gy or radius", }
Response	Content Type	Text
HTTP Status	202	{ "imsi": "", "channel": "gy or radius", "sessionId": "", }
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 13

API Gateway/NGINX

NOKIA

13 API Gateway/NGINX

{baseUrl} example: wdh-sitstg2.nokiawing.com

13.1 Echo

Description:

This API is used for Echo.

API Interface	Echo	
URL	https://{baseUrl}/gateway/echo	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200-OK	ok // text or string
	401 - Unauthorized	No valid JWT token provided.
	403 - Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 14

Invoice Data

NOKIA

14 Invoice Data

{baseUrl} example: wdh-sitstg2.nokiawing.com

14.1 Get Invoice Details

Description:

This API is used to get the details of the invoice for given account.

API Interface	Get Invoice Details	
URL	https://{baseUrl}/api/v1/invoice-data/invoice-data/v1/getInvoiceDetails/7633	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	<pre>{ "accountName": "3AT Test 04 MRR_2505", "status": "Draft", "externalAccountId": "2341", "billingPeriod": "2022-04-25", "currency": "EUR", "activeSubscribers": 2, "masterAccountGrandTotalSub": 4, "dataUsage": 34, "smsUsage": 55, "voiceUsage": 29, "simChargesTotal": 21, "accountChargesTotal": 7, "accountTotal": 4, "masterAccountGrandTotalCharges": 89 }</pre> <p>Data Types String accountName;</p>

API Interface	Get Invoice Details	
		String status; String externalAccountId; Date billingPeriod; String currency; int activeSubscribers; int masterAccountGrandTotalSub; double dataUsage; double smsUsage; double voiceUsage; int simChargesTotal; long accountChargesTotal; long accountTotal; double masterAccountGrandTotalCharges;
	400 - Bad Request	The request was unacceptable, often due to missing a required parameter.
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.

Chapter 15

Rating Service

NOKIA

15 Rating Service

{baseUrl} example: wdh-sitstg2.nokiawing.com

{Version} example: v1

15.1 Get Rate Plan Name and ID

Description:

This API is used to get rate plan name and ID with filters Account ID and Rate plan ID.

API Interface	Get Rate Plan Name and ID	
URL	https://{baseUrl}/api/{version}/rating/getrateplans	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	<pre> [["name": "rateplan1", "id": "1"], ["name": "rateplan2", "id": "2"]] </pre> <p>Data Types String name; Long id;</p>
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.

API Interface	Get Rate Plan Name and ID	
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Examples:</p> <ol style="list-style-type: none"> To get rateplan name, id by accountId and rateplanId https://{baseUrl}/api/v1/rating/getrateplans?accountId=1,2&rateplanId=1,2 To get rateplan name, id by accountId https://{baseUrl}/api/v1/rating/getrateplans?accountId=1,2 To get rateplan name, id by rateplanId https://{baseUrl}/api/v1/rating/getrateplans?rateplanId=1,2 		

15.2 Get Rate Plan Details by Rate Plan ID

Description:

This API is used to get rate plan details by Rate Plan ID.

API Interface	Get Rate Plan Details with Rate Plan ID	
URL	https://{baseUrl}/api/{version}/rating/getrateplandetails?id	
Request	Method: GET, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
Response	Content Type	Text
HTTP Status	200 - OK	[{ "name": "PP2", "id": 4044, "tenant_id": "7", "version": 0, "activation_fee": null, "network_access_fee": null, "subscription_fee": 10.0, "re_activation_fee": null, "pool_activation_fee": 0.0, }

API Interface	Get Rate Plan Details with Rate Plan ID	
		<pre> "pool_subscription_fee": 0.0, "start_date": "2022-05-11", "end_date": "2022-05-31", "plan_type": "Individual Bundle", "status": "Draft", "subscription_type": "Prepaid", "included_test_data": 0, "included_test_sms": null, "included_test_voice": null, "included_test_data_unit": "KB", "included_test_sms_unit": "SMS", "included_test_voice_unit": "Minute", "expiry_date": null, "trial_duration": 0, "rounding_for_data": "None", "rounding_for_voice": "None", "timeinterval_id": 1101, "tiered_volume_type": null, "validity_period": 5, "renew_on_expiry": true, "band_labels": [{ "id": 5023, "counter_data": 0, "counter_data_unit": "MB", "counter_sms_mo_unit": "0", "counter_sms_mt_unit": "0", "counter_voice_mo_unit": "0", "counter_voice_mt_unit": "0", "counter_sms_mo": 7, "counter_sms_mt": 0, "counter_voice_mo": 0, "counter_voice_mt": 0, "ratinggroup_id": null, "servicelist_id": 4146, "bandlabel_id": 4922, </pre>

	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
<p>Examples:</p> <ol style="list-style-type: none"> To get rateplan name, id by accountId and rateplanId https://{baseUrl}/api/v1/rating/getrateplans?accountId=1,2&rateplanId=1,2 To get rateplan name, id by accountId https://{baseUrl}/api/v1/rating/getrateplans?accountId=1,2 To get rateplan name, id by rateplanId https://{baseUrl}/api/v1/rating/getrateplans?rateplanId=1,2 		

Chapter 16

Change Static IP

NOKIA

16 Change Static IP

Description:

This API Changes the current static IP address assigned to a SIM for another one available in any of the IP Pools of the static APNs that the SIM has assigned. After the change the previous IP address is made available. SIM should have a static IP assigned previously.

{baseUrl} example: wdh-sitstg2.nokiawing.com

{Version} example: v1

API Interface	Change Static IP	
URL	https://{baseUrl}/api/{Version}/subscription/sims/change/ipaddress	
Request	Method: POST, Content type: application/json	
	Header	'Authorization: Bearer <ACCESS_TOKEN>' 'Account-Context-Id: <ACCOUNT_ID>'
	Body	{ "accountId": 7918, "apnGroupName": "G5", "apnName": "mani_03", "iccid": "1955644099890010269", "imsi": "234509001020269", "ipAddress": "10.21.120.97", "ipPoolName": "mani_03" }
	Request Parameters	ICCID APN Group Name APN name IP Pool IP Address
Response	Content Type	application/json
HTTP Status	202 – Accepted	{ "iccid": "1955644099890010269", "imsi": "234509001020269", "accountId": 7918, "apnName": "mani_03",

API Interface	Change Static IP	
		"ipAddress": "10.21.120.97", "apnGroupName": "G5", "wdhTransactionId": "d0543b21-37b2-48fe-9ace-08880f01fa72" }
	401 – Unauthorized	No valid JWT token provided.
	403 – Forbidden	User does not have permissions to perform the request.
	429 - Too Many Requests	Too many requests hit the API too quickly. We recommend an exponential backoff of your requests.
	404 - Not Found	The requested resource does not exist.
	500, 502, 503, 504 - Server Errors	Something went wrong on WING Digital Hub's end. Contact WING Digital Hub support to resolve these issues.
